

00:00:00,460 --> 00:00:08,140 [Speaker 0]

Doctor, actually, uh, you know, my-- you, you send me a message request for all the sensor information. My colleague is still-

00:00:08,140 --> 00:00:08,150 [Speaker 1]

Right.

00:00:08,150 --> 00:00:19,500 [Speaker 0]

-preparing this sensor information. I think he's able to give you maybe tomorrow or maximum after tomorrow, because we need to check with our IND guys to give us all the list.

00:00:20,820 --> 00:00:21,300 [Speaker 1]

Okay.

00:00:21,300 --> 00:00:21,900 [Speaker 0]

Okay.

00:00:21,900 --> 00:00:23,000 [Speaker 1]

You, you, you can, uh-

00:00:23,000 --> 00:00:23,160 [Speaker 0]

Yeah.

00:00:23,160 --> 00:00:30,160 [Speaker 1]

-you can talk about, uh, um, um, uh, document, uh, you send me if you understand-

00:00:30,160 --> 00:00:30,330 [Speaker 0]

Yeah.

00:00:30,330 --> 00:00:32,380 [Speaker 1]

-my, my, uh, inquiry.

00:00:32,380 --> 00:00:33,220 [Speaker 0]

Yeah, request.

00:00:33,220 --> 00:00:35,380 [Speaker 1]

Yeah. I, I understand. Yeah, I understand.

00:00:35,380 --> 00:00:36,580 [Speaker 0]

Yeah, documentation.

00:00:36,580 --> 00:00:37,720 [Speaker 1]

Your...

00:00:37,720 --> 00:00:39,680 [Speaker 0]

Yes, yes. We will give you the-

00:00:39,680 --> 00:00:39,780 [Speaker 1]

Instrument.

00:00:39,780 --> 00:00:41,580 [Speaker 0]

-documentation.

00:00:41,580 --> 00:00:43,269 [Speaker 1]

Yeah, instrument function description.

00:00:44,840 --> 00:00:46,740 [Speaker 0]

Yeah, yeah. It's, it's fine.

00:00:46,740 --> 00:00:50,060 [Speaker 1]

And, uh, you're gonna send it, uh, in a PDF format, right?

00:00:52,080 --> 00:00:54,200 [Speaker 0]

Uh, PDF yeah. Normally we send-

00:00:54,200 --> 00:00:54,350 [Speaker 1]

Yeah.

00:00:54,350 --> 00:00:55,980 [Speaker 0]

-PDF. Yeah.

00:00:55,980 --> 00:00:56,760 [Speaker 1]

Okay. Awesome.

00:00:58,100 --> 00:00:59,940 [Speaker 1]

All right. Are we still waiting for someone else?

00:01:02,020 --> 00:01:03,410 [Speaker 0]

Uh, one of my

00:01:04,760 --> 00:01:07,400 [Speaker 0]

colleague is coming, I think. Is, uh-

00:01:07,400 --> 00:01:07,640 [Speaker 1]

Okay.

00:01:09,100 --> 00:01:10,720 [Speaker 0]

Okay, let me see.

00:01:22,460 --> 00:01:22,720 [Speaker 0]

Mm.

00:01:24,640 --> 00:01:28,260 [Speaker 0]

I think one-- our technical guy is still waiting, waiting for...

00:01:29,560 --> 00:01:30,300 [Speaker 0]

Let me-

00:01:30,300 --> 00:01:30,490 [Speaker 1]

Okay.

00:01:30,490 --> 00:01:30,880 [Speaker 0]

Let me call him.

00:01:32,400 --> 00:01:33,680 [Speaker 1]

Thank you.

00:01:33,680 --> 00:01:35,340 [Speaker 2]

Which time you come back in Morocco?

00:01:37,380 --> 00:01:38,900 [Speaker 0]

Uh, maybe in May.

00:01:40,400 --> 00:01:41,340 [Speaker 2]

May. The first May or-

00:01:41,340 --> 00:01:42,120 [Speaker 0]

I'm not sure.

00:01:43,330 --> 00:01:43,470 [Speaker 2]

Or...

00:01:43,470 --> 00:01:50,060 [Speaker 0]

[chuckles] Middle May. May-- Or maybe end of the May. Because, uh, middle May we have, uh, we have a guest.

00:01:51,180 --> 00:01:52,900 [Speaker 0]

We have a guest, uh, from Morocco.

00:01:54,340 --> 00:01:55,300 [Speaker 2]

Oh, okay.

00:01:55,300 --> 00:01:58,140 [Speaker 1]

Mm.

00:01:58,140 --> 00:01:59,240 [Speaker 2]

[in audible]

00:01:59,240 --> 00:02:00,280 [Speaker 1]

So a new client?

00:02:01,880 --> 00:02:03,800 [Speaker 0]

Uh, yeah, it's a new client, but not for,

00:02:04,920 --> 00:02:07,300 [Speaker 0]

not for pet. It's a skin structure.

00:02:08,479 --> 00:02:08,960 [Speaker 2]

For cat food. For cat food.

00:02:08,960 --> 00:02:09,259 [Speaker 1]

Oh, okay. [chuckles]

00:02:09,259 --> 00:02:09,979 [Speaker 0]

Not for pet.

00:02:11,360 --> 00:02:25,299 [Speaker 0]

Yeah. You know, after, after doctor invest pet food, other people hesitate. They say, "Oh, doctor already invest one powerful guy in Marrakech, invest pet food. We cannot do it."

00:02:27,060 --> 00:02:27,070 [Speaker 1]

[chuckles]

00:02:27,070 --> 00:02:30,320 [Speaker 0]

[chuckles] Yes.

00:02:31,560 --> 00:02:32,540 [Speaker 2]

Uh, Nicola.

00:02:33,600 --> 00:02:34,630 [Speaker 2]

Nicola.

00:02:34,630 --> 00:02:43,620 [Speaker 0]

[in audible]

00:02:43,620 --> 00:02:46,450 [Speaker 1]

[in audible]

00:02:46,450 --> 00:03:00,920 [Speaker 0]

[in audible]

00:03:02,440 --> 00:03:20,720 [Speaker 2]

[in audible]

00:03:20,760 --> 00:03:58,820 [Speaker 0]

Uh, I think we can start, uh, doctor. No need to wait, uh-

00:03:58,820 --> 00:03:59,460 [Speaker 1]

Okay, good.

00:04:00,520 --> 00:04:00,900 [Speaker 0]

Yeah, we can start.

00:04:00,900 --> 00:04:01,840 [Speaker 1]

All right. Go ahead.

00:04:03,040 --> 00:04:03,240 [Speaker 0]

Mm.

00:04:04,640 --> 00:04:15,700 [Speaker 0]

So, uh, according to our last meeting, you know, actually for, for the air solution. For the warehouse air solution, our project is-

00:04:15,700 --> 00:04:15,710 [Speaker 1]

Yeah.

00:04:15,710 --> 00:04:17,959 [Speaker 0]

-trying to, to get a price.

00:04:19,280 --> 00:04:20,140 [Speaker 0]

Get a price from-

00:04:20,140 --> 00:04:20,390 [Speaker 1]

Okay.

00:04:20,390 --> 00:04:26,060 [Speaker 0]

-some, some suppliers. Because this one we don't do and, uh, we don't have a solution. No money.

00:04:27,400 --> 00:04:27,900 [Speaker 0]

And to be-

00:04:27,900 --> 00:04:27,909 [Speaker 1]

Okay.

00:04:27,909 --> 00:04:32,680 [Speaker 0]

-frank, this one I think doctor can-- as a, as a partner, you cannot put

00:04:33,780 --> 00:04:46,720 [Speaker 0]

directly on Samsung side hundred percent, really. Because we don't, we don't do this, uh, the air solution usually. Even in China, you know, the ten K solution. Some special company, they do this.

00:04:49,440 --> 00:05:05,220 [Speaker 0]

You get my point or no? We just, uh, Samsung as a, you know, solution provider, just we guarantee our equipment works. But anyway, as a, as a partner now we are checking the price. If it's a small price,

00:05:06,580 --> 00:05:10,900 [Speaker 0]

I think it's easy, but if it's a big price, we need to, uh, discuss

00:05:12,800 --> 00:05:15,680 [Speaker 0]

this, uh, this air solution. Like air conditioning.

00:05:15,680 --> 00:05:16,020 [Speaker 1]

Okay.

00:05:16,020 --> 00:05:16,420 [Speaker 0]

Yeah.

00:05:17,520 --> 00:05:19,940 [Speaker 1]

Uh, exactly. You need HVAC, right?

00:05:22,100 --> 00:05:23,160 [Speaker 0]

Yeah. Like, like this, yeah.

00:05:24,480 --> 00:05:27,300 [Speaker 1]

No HVAC system, right? Ventilation.

00:05:29,460 --> 00:05:39,140 [Speaker 0]

Yeah. Actually, I-- we check with some supplier. They, they do like, uh, like a water cooling, you know? With a water cooling for the warehouse.

00:05:41,700 --> 00:05:42,420 [Speaker 2]

Water cooling?

00:05:42,420 --> 00:05:46,120 [Speaker 1]

No, no, no. I think you misunderstood probably.

00:05:46,120 --> 00:05:46,320 [Speaker 0]

Yeah.

00:05:47,360 --> 00:05:50,360 [Speaker 1]

What we were talking about is how do we control

00:05:51,600 --> 00:05:52,480 [Speaker 1]

the temperature,

00:05:53,520 --> 00:05:53,780 [Speaker 1]

you know-

00:05:55,380 --> 00:05:55,690 [Speaker 0]

Yeah.

00:05:55,690 --> 00:05:59,790 [Speaker 1]

-uh, of the warehouse. Okay? So it's like air conditioning. Where to-

00:06:00,748 --> 00:06:01,038 [Speaker 0]

Yeah.

00:06:01,038 --> 00:06:01,188 [Speaker 1]

Air conditioning.

00:06:01,188 --> 00:06:03,068 [Speaker 0]

It's not air conditioning. Yeah.

00:06:03,068 --> 00:06:17,408 [Speaker 1]

So, so the production line would not, would not be affected by the... Let's say when it's hot, it will not affect the product in the production line. Do you see what I'm saying?

00:06:19,208 --> 00:06:19,687 [Speaker 0]

Yeah.

00:06:19,688 --> 00:06:20,008 [Speaker 1]

Okay, so-

00:06:20,048 --> 00:06:20,808 [Speaker 0]

So production line,

00:06:22,188 --> 00:06:31,968 [Speaker 0]

e-e-even it's hot, no problem. We don't have a problem for, for the hot temperature. Just I think you, you need to have a, you know, warehouse to...

00:06:33,008 --> 00:06:35,668 [Speaker 0]

Warehouse air conditioning. Because our machinery-

00:06:35,668 --> 00:06:36,278 [Speaker 1]

Exactly.

00:06:36,278 --> 00:06:43,008 [Speaker 0]

-not, not afraid of, uh, the hot temperature. We need to heat the material anyway with a very, very high temperature.

00:06:45,588 --> 00:06:56,168 [Speaker 1]

Okay, Mike, just so, so, so we can be clear here. You-- What you just said, you said even if it's hot, it will not affect the quality of the product, of the cable?

00:06:56,168 --> 00:06:58,238 [Speaker 0]

No, no, no. It's-- Yeah, yeah, it's not affect.

00:06:59,788 --> 00:07:01,688 [Speaker 1]

Okay. Can you explain me why?

00:07:04,308 --> 00:07:04,828 [Speaker 0]

Because we-

00:07:04,828 --> 00:07:05,307 [Speaker 1]

So let's say-

00:07:05,307 --> 00:07:14,407 [Speaker 0]

Our production line is very hot with the, with the steam, you know, before the dryer, even, uh, uh, even after the dryer, all the material-

00:07:14,408 --> 00:07:14,528 [Speaker 1]

Yeah.

00:07:14,528 --> 00:07:18,728 [Speaker 0]

-is very hot. Is, is much, much hotter than the air temperature.

00:07:20,468 --> 00:07:24,648 [Speaker 1]

Okay. At what temperature does, does the cable comes out from the dryer?

00:07:26,268 --> 00:07:33,608 [Speaker 0]

From the dryer, I think around, uh, maybe sixty to eighty degrees. Depends on-

00:07:33,608 --> 00:07:34,228 [Speaker 1]

Si-

00:07:34,228 --> 00:07:34,668 [Speaker 0]

Uh, de-

00:07:34,668 --> 00:07:34,908 [Speaker 1]

Okay.

00:07:34,908 --> 00:07:36,168 [Speaker 0]

Yeah.

00:07:36,168 --> 00:07:41,388 [Speaker 1]

Okay. And then it goes to the, then it goes to the coating, uh, right?

00:07:41,388 --> 00:07:44,748 [Speaker 0]

Yeah. Coating also with the hot temperature. Yeah, with the hot cable.

00:07:44,748 --> 00:07:46,318 [Speaker 1]

It's vacuum. It's vacuum.

00:07:46,318 --> 00:07:47,688 [Speaker 0]

Yeah. We inject... Yeah.

00:07:49,248 --> 00:07:54,408 [Speaker 1]

Okay. And then when it comes out from the, uh, from the coating, at what temperature does it come out?

00:07:56,468 --> 00:07:56,788 [Speaker 0]

Uh,

00:07:57,888 --> 00:08:03,467 [Speaker 0]

from the-- It's-- I think a little bit lower than the, than the dryer. But not very big difference.

00:08:03,468 --> 00:08:07,458 [Speaker 1]

Give me, give me a range. Not a big difference. Give me a range. Like sixty-

00:08:07,458 --> 00:08:08,028 [Speaker 0]

Yeah, yeah. Not the...

00:08:09,448 --> 00:08:13,598 [Speaker 0]

No, no. Not-- I, I, I don't have the exact number. I, I think my colleague-

00:08:13,598 --> 00:08:14,248 [Speaker 1]

Okay.

00:08:14,248 --> 00:08:15,287 [Speaker 0]

-uh, have this number. Yeah.

00:08:16,308 --> 00:08:20,638 [Speaker 1]

Okay. Uh, and then when it goes from the... When it goes, uh,

00:08:21,968 --> 00:08:26,088 [Speaker 1]

uh, to the cooling, it comes out at normal temperature from the cooling, right?

00:08:27,328 --> 00:08:35,708 [Speaker 0]

Yeah, yeah. Uh, it, it reduce maybe to, uh... Normally it's like, uh, ambient temperature, you know, like, uh, uh-

00:08:35,708 --> 00:08:37,548 [Speaker 1]

Ambient temperature. Okay.

00:08:37,548 --> 00:08:37,888 [Speaker 0]

Yeah, yeah.

00:08:37,888 --> 00:08:38,428 [Speaker 1]

Thank you.

00:08:38,428 --> 00:08:39,068 [Speaker 0]

It's little bit, uh-

00:08:39,068 --> 00:08:40,048 [Speaker 1]

Let's say-

00:08:40,048 --> 00:08:43,518 [Speaker 0]

Maybe a little bit higher. A little bit higher than the ambient.

00:08:43,518 --> 00:08:43,568 [Speaker 1]

Okay.

00:08:43,568 --> 00:08:43,838 [Speaker 0]

Ambient temperature. Yeah.

00:08:43,838 --> 00:08:46,308 [Speaker 1]

Let's say it's forty degrees in the warehouse,

00:08:47,908 --> 00:08:48,208 [Speaker 1]

all right?

00:08:48,208 --> 00:08:48,348 [Speaker 0]

Yeah.

00:08:49,468 --> 00:08:51,268 [Speaker 0]

So this one also around the forty.

00:08:52,628 --> 00:08:59,708 [Speaker 1]

Okay. And it comes out at twenty-five. Don't you think it's gonna warm up while it's being, uh, packaged?

00:09:06,728 --> 00:09:09,408 [Speaker 0]

You mean the, the, the cable is forty degrees?

00:09:11,048 --> 00:09:16,568 [Speaker 1]

Okay. Cable comes out from the cooling, the cooling system at twenty-five, you said.

00:09:17,648 --> 00:09:28,428 [Speaker 1]

And it's, it's hot in the, in the warehouse. So the cable is gonna warm up, right? Because the environment is hot.

00:09:28,428 --> 00:09:29,728 [Speaker 0]

Uh, this one...

00:09:31,288 --> 00:09:36,338 [Speaker 0]

No, the, the temperature stay, not increase, I think, because it will stay like, uh-

00:09:36,338 --> 00:09:36,338 [Speaker 1]

No.

00:09:36,338 --> 00:09:40,248 [Speaker 0]

-ambient temperature. It, it will not increase the temperature.

00:09:41,548 --> 00:09:46,028 [Speaker 1]

So unless, unless the packaging area is at the ambient temperature.

00:09:47,868 --> 00:09:48,148 [Speaker 0]

Yes.

00:09:49,568 --> 00:10:05,988 [Speaker 1]

All right. So now you understand our problem. Our problem, we have to make sure that our air conditioning system ventilation maintains the warehouse temperature, the ambient temperature, so do-- it will not affect, it will not affect the quality of the cable.

00:10:05,988 --> 00:10:20,208 [Speaker 0]

Yeah. Or we can... Another solution is, you know, we can do, I think for the, for the cooler, around the cooler, we can reduce the, the air temperature. Because, you know, we need the fresh air go through the cooler. If we-

00:10:20,208 --> 00:10:20,457 [Speaker 1]

Yes.

00:10:20,457 --> 00:10:27,548 [Speaker 0]

-inject the, the cold air to the cooler, this problem will be solved. Just this, uh, I think it's fine.

00:10:29,148 --> 00:10:30,268 [Speaker 0]

Because normally, uh,

00:10:31,628 --> 00:10:41,488 [Speaker 0]

normally we do, uh, as a normal air tempera-- uh, air go inside the cooler. But if the air is very, very hot, I think we need to cool, cool down the air.

00:10:41,488 --> 00:10:45,388 [Speaker 1]

How we're gonna cool down the air? With what?

00:10:46,768 --> 00:10:57,468 [Speaker 0]

Yeah, yeah. For the, for this one, we can have, uh, uh, we can-- we have a machine to-- like a filter, you know, to cool, cool down the air, then go to the cooler.

00:11:00,788 --> 00:11:05,888 [Speaker 0]

I, I will, I will ask my... I think my colleague is on. Let me see.

00:11:07,028 --> 00:11:08,018 [Speaker 1]

Yeah. Kevin is, uh-

00:11:09,588 --> 00:11:24,888 [Speaker 0]

[speaking in foreign language]

00:11:26,788 --> 00:11:27,348 [Speaker 1]

Yeah.

00:11:27,348 --> 00:11:31,647 [Speaker 3]

[speaking in foreign language]

00:11:31,647 --> 00:11:36,688 [Speaker 0]

[speaking in foreign language]

00:11:36,688 --> 00:11:41,038 [Speaker 3]

[speaking in foreign language]

00:11:41,038 --> 00:11:44,718 [Speaker 0]

[speaking in foreign language]

00:11:44,718 --> 00:11:44,718 [Speaker 3]

[speaking in foreign language]

00:11:44,718 --> 00:11:44,718 [Speaker 0]

[speaking in foreign language]

00:11:44,718 --> 00:12:09,358 [Speaker 3]

[speaking in foreign language]

00:12:11,258 --> 00:12:19,118 [Speaker 4]

呃，就-就如果说是着眼于这个，就是换温这个事情的话，就是说先把温度把它换一下嘛，对吧？

00:12:19,118 --> 00:12:25,018 [Speaker 0]

对对对，人家就是那个冷却，冷却那边可以搞个那个。

00:12:25,018 --> 00:12:25,638 [Speaker 1]

做隔间。

00:12:27,838 --> 00:12:51,578 [Speaker 4]

是-是这样，是这样的老费啊，我-我们，我们之前给他，给他把-把，对，我们，我们之前给他把这个项目里面做过隔间，然后隔间的话，他是，他把，他把每个，每个隔间把，他把温度稍微，稍微控制一下，就是就相当于我，他上次的回复不是说了嘛，他不是控，他普通的那个商用的那个空调是没有办法达到要求的吧，他自己不是说了嘛，是啊。

00:12:53,398 --> 00:12:54,578 [Speaker 0]

那这个要-要这个。

00:12:54,578 --> 00:12:55,018 [Speaker 4]

对，他是。

00:12:55,018 --> 00:12:58,218 [Speaker 0]

相当于工厂用工业，工业空调吧，是吧？

00:12:58,218 --> 00:13:09,278 [Speaker 4]

对对对对。其实相当于，对，他上次，上次你截的那个图上面那个表格上面下面不是附录的嘛，就是说普通的那个商用的空调它是没有办法达到要求嘛，他不是说的这个意思嘛。

00:13:11,518 --> 00:13:19,058 [Speaker 0]

嗯，其实我觉得商用空调也可以啊，为啥不行啊？你把那个冷科技这-这个全部把它封起来吧。

00:13:19,058 --> 00:13:34,338 [Speaker 4]

对，这我们，我-我们正常的，对，我们正常的做法，像现在在国内一般的做法都是，都是这个用-用水啊，就是说用-用水冷却的办法，就是给，给每个需要降温的地方进行降温。

00:13:35,728 --> 00:13:39,238 [Speaker 0]

哦，就是放几个水空调呗，是吧？然后把它隔起来。

00:13:40,638 --> 00:13:46,738 [Speaker 4]

嗯，他要是着急的话，我-我-我-我-我可以找一下这方面的资料给他看一眼。

00:13:49,178 --> 00:13:54,848 [Speaker 4]

你要是，你要是现在就找，就给。对对对，我来，我来找点资料给他，让他来看一下，看看行不行。

00:13:56,318 --> 00:13:59,878 [Speaker 0]

呃，Sam and doctor。

00:13:59,878 --> 00:14:01,778 [Speaker 1]

Yes, yes。

00:14:01,778 --> 00:14:19,518 [Speaker 0]

This one actually our designer said some area in China also they do the same. In the necessary area they choose the install the air cooling system. They close for example for the cooler they make a close room and install one-

00:14:19,518 --> 00:14:19,757 [Speaker 1]

Yeah。

00:14:19,757 --> 00:14:21,718 [Speaker 0]

Like a yeah like a cooler.

00:14:23,358 --> 00:14:24,618 [Speaker 1]

Yeah, yeah, I know.

00:14:24,618 --> 00:14:26,658 [Speaker 0]

In a yeah in a certain area.

00:14:27,798 --> 00:14:30,018 [Speaker 1]

Is it a certain area?

00:14:30,018 --> 00:14:33,898 [Speaker 0]

Yeah just cooler. We need to have a you know the air cooling.

00:14:34,938 --> 00:14:38,598 [Speaker 1]

But okay, do you, okay, do you have the blueprint

00:14:39,698 --> 00:14:55,958 [Speaker 1]

for each zone, let's say from raw materials to, to the packing packaging area to the, to the final goods to the storage. Do you have the zoning and the condition of temperature and pressure and humidity for each zone?

00:14:58,228 --> 00:15:04,598 [Speaker 0]

哦，我们这个周老师，这客户问我们有没有这每个区啊，比如说像原料接收啊。

00:15:04,598 --> 00:15:04,607 [Speaker 4]

对。

00:15:06,318 --> 00:15:16,158 [Speaker 0]

粉碎啊，就各个分区的这个理想的温度、湿度，有没有这样的数据啊？这个有吗？

00:15:16,198 --> 00:15:28,078 [Speaker 4]

这个就难了，这个之前，之前没做过这么详细。理论上做的话应该是从洁净区到，到非洁净区，应该是呃，呈现一个微正，微正压的状态。

00:15:29,978 --> 00:15:32,858 [Speaker 0]

呈现什么，什么状态？

00:15:32,858 --> 00:15:34,978 [Speaker 4]

呈现一个微正，微正压的一个状态。

00:15:37,218 --> 00:15:44,038 [Speaker 0]

其实我感觉他这个，这个冷却这边可能成品仓这边有点问题，其他我觉得没有问题啊，其他有啥问题？

00:15:44,038 --> 00:15:53,478 [Speaker 4]

我理解你，老费，我知道你的意思，我懂。关键他-他天天揪着这个事情不放，你知道吧，你劝不服他，你知道吧。还有。

00:15:53,478 --> 00:15:53,898 [Speaker 0]

对。

00:15:53,898 --> 00:15:58,838 [Speaker 4]

他要，他要看到资料，他要看到资料，知道吧？劝不服他。

00:16:00,918 --> 00:16:04,518 [Speaker 0]

那我们不行，我们给他一个吧。你到时你-你-你整理一下。

00:16:04,518 --> 00:16:14,438 [Speaker 4]

我来，我来，我来找个，我来找个数据，或者找个资料给他，看看他-他-他-他对于这样的东西能不能，能不能满意，可以吗？好不好？

00:16:15,718 --> 00:16:16,538 [Speaker 0]

行啊行啊行啊。

00:16:16,538 --> 00:16:33,278 [Speaker 4]

或者，或者，对，或者我把那个图，他不是有图纸吗？我把图纸我给他分为区，我大概我标个温度给他，看看，然后通过什么样的办-办法来达到这个，来通过什么样的办法来达到这个温度，至于什么样的办法，他们自己去找吧，我告诉他，告诉他应该有办法。

00:16:33,278 --> 00:16:42,558 [Speaker 0]

我觉得原料，我觉得原料接收啊，粉碎混合这一块应该不要紧吧，这温度高一点低一点不要紧，对不对？

00:16:42,558 --> 00:16:47,798 [Speaker 4]

你，我这么说吧，你阿根廷啊，跟摩洛哥，跟摩洛哥的温度是不是差不多？

00:16:47,798 --> 00:16:48,318 [Speaker 0]

差不多啊。

00:16:49,918 --> 00:16:54,518 [Speaker 4]

那你们，那-那你阿根廷的试跑场是怎么解决的？[笑]

00:16:54,518 --> 00:17:05,638 [Speaker 0]

对，我们阿根廷好像它没有在那种特别热的地方，但这个客户它是在正好在摩洛哥特别热的地方，它跟阿根廷还不一样。阿根廷那边。对对对。

00:17:07,258 --> 00:17:07,658 [Speaker 4]

是这个原因。

00:17:07,658 --> 00:17:10,278 [Speaker 0]

他说我选了个热的地方啊。

00:17:10,278 --> 00:17:10,288 [Speaker 4]

[笑]

00:17:12,478 --> 00:17:32,398 [Speaker 4]

没关系，如果说要降温的话。如果说要-要-要降温的话，其实，其实，其实国内的，国内上次我说的新风系统吧，是整体，整体来调控的，但是这样的话，就是说对于国内用整体调控的新风系统来做的话，其实，其实价格，价格划-划不来。对。

00:17:32,398 --> 00:17:54,518 [Speaker 0]

啊，太高了，我觉得它这个后期运营成本也很高，我觉得就把冷却这一部分我觉得是比较关键的，因为它要把这个是吧，你要把宠物粮要把它冷却到合适的温度，你不然这个热的话打包也不行，或者你这个热的东西你在那个料仓里面，在成品仓里面，它也会产生冷凝水啊或者啥的，估计也不太好。

00:17:54,518 --> 00:18:01,698 [Speaker 4]

那个老费，我-我们，我们只推，我们只推荐环境温度大概做多少度合适，这样，这样推荐吧。

00:18:02,738 --> 00:18:11,698 [Speaker 4]

对，你-你无论怎么样，你对，你-你也不，你，人-人在里面操作，你-你，他也得有个温度范围，对吧？我们是推荐的。

00:18:11,698 --> 00:18:11,758 [Speaker 0]

嗯。

00:18:11,758 --> 00:18:15,668 [Speaker 4]

就是说多-多少的环境温度合适。至于，至于这个。

00:18:15,668 --> 00:18:16,558 [Speaker 0]

给来个范围。

00:18:17,894 --> 00:18:24,654 [Speaker 4]

对对对，至于内部的温度，我-我-我感觉我们没有必要给-给他说得太明，太明确。我们也不，我们也没办法说明确了。

00:18:27,754 --> 00:18:29,794 [Speaker 4]

好不好？

00:18:29,794 --> 00:18:44,314 [Speaker 0]

关键我告诉你，这个东西就弄到最后啊，客户肯定，他肯定说啊，你们这个当时设计的时候怎么没考虑，这个还是找我们算账，你知道吧？我是担心这个东西，你现在不给他很详细，我们还是要给一个方案的。

00:18:45,794 --> 00:18:56,814 [Speaker 4]

那你给，那，那你给他个方案，哦，这个东西，哦，那你，那我，那我反-反过来了。嗯。那我反过来，我-我-我难听一点，难听。

00:18:57,874 --> 00:18:58,154 [Speaker 0]

你说。

00:18:59,954 --> 00:19:03,554 [Speaker 4]

你-你-你-你这个电灯，我-我-我-我要不要给你设计到位？

00:19:05,294 --> 00:19:06,074 [Speaker 0]

哪个？灯啊。

00:19:07,354 --> 00:19:11,634 [Speaker 4]

对啊，你车间里面电灯是不是我也得给你设-设计到位。

00:19:11,654 --> 00:19:15,914 [Speaker 0]

没有灯当时就谈了的，我们价格也给了，知道吧？这个我们当时也都。

00:19:15,914 --> 00:19:16,594 [Speaker 4]

我知道的。

00:19:16,594 --> 00:19:21,254 [Speaker 0]

这些都谈过了，灯包括消防都谈了，就是当时让他们自己搞的嘛。

00:19:24,194 --> 00:19:24,574 [Speaker 0]

知道吧？

00:19:24,574 --> 00:19:26,334 [Speaker 4]

这么，这么，确实，确实。

00:19:26,334 --> 00:19:31,814 [Speaker 0]

就是一开始其实怪，就怪什么啊，一开始我们没有谈清楚，你知道吧？也没，没说出-

00:19:31,814 --> 00:19:32,814 [Speaker 4]

这个温度，这个温度。

00:19:32,814 --> 00:19:37,733 [Speaker 0]

环境温度深究，没-没-没有太考虑这一块，是不是？孙老师是吧？

00:19:37,734 --> 00:19:37,964 [Speaker 5]

对。

00:19:37,964 --> 00:19:38,813 [Speaker 0]

没太考虑这一块。

00:19:38,814 --> 00:19:41,294 [Speaker 5]

是，也没，也确实也没想到。

00:19:41,294 --> 00:19:41,554 [Speaker 0]

对，你如果。

00:19:42,854 --> 00:19:42,924 [Speaker 5]

对。

00:19:42,924 --> 00:19:55,654 [Speaker 0]

对啊，你如果当初考虑了，我们跟客户谈一下啊，你这边可能要把温度降一下是吧？这个东西多少钱，啊，我们来做，或者你们做，那就没问题。关键是我们都没提，是这个问题。

00:19:56,954 --> 00:20:05,514 [Speaker 0]

那些灯啊啥他不会找我们的。你灯什么的，消防系统，包括什么实验室的设备，我们都跟他提了，那都他自己来搞。

00:20:06,854 --> 00:20:11,374 [Speaker 4]

那你这个，你现在这个东西不可能免费我给他做一个吧，这不可能的。

00:20:11,374 --> 00:20:18,384 [Speaker 0]

我知道，这个免费不免费，我们先把这个东西整出来，就是你得先把方案弄出来，就告诉咱们。

00:20:18,384 --> 00:20:18,453 [Speaker 4]

行。

00:20:18,454 --> 00:20:20,874 [Speaker 0]

是这样那个方案，啊，多少钱，我们后面再说。

00:20:22,134 --> 00:20:32,514 [Speaker 0]

如果他能承-承担嘛，那最好，不能承担，我们到时再商量一个解决办法。但是现在这边肯定也不是个事，因为他还是依赖我们，他不懂呀，是不是？

00:20:32,514 --> 00:20:34,374 [Speaker 4]

了解，了解，了解。

00:20:35,614 --> 00:20:37,514 [Speaker 0]

Uh, okay, Sam, uh, I discussed with-

00:20:38,534 --> 00:20:38,543 [Speaker 5]

Yes.

00:20:38,543 --> 00:20:41,214 [Speaker 0]

...my colleague. Actually he cannot give the exact-

00:20:41,214 --> 00:20:47,314 [Speaker 5]

Okay. Can you do me a favor? Ask, ask your, uh, your colleague to send me

00:20:48,474 --> 00:21:15,954 [Speaker 5]

from raw material to the, to the final end of the pro-production line, the temperature of the input raw materials from extruder, how-- what temperature does it come out? What tempera-what temperature does it get into the dryer? What temperature does it come out from the dryer? What temperature does it get into the coating? What temperature does it come out from the coating? And what tempera-- uh, does it come out from the cooling? Step by step, each step of the process.

00:21:15,954 --> 00:21:24,654 [Speaker 0]

But, but, but Sam, I think for, for the input and output raw material, uh, I think before the, before the,

00:21:26,094 --> 00:21:33,894 [Speaker 0]

the cooler is not important because our machinery need high temperature definitely is much higher than the-

00:21:33,894 --> 00:21:36,334 [Speaker 5]

Okay. Yes, I understand that.

00:21:36,334 --> 00:21:41,734 [Speaker 0]

Yeah. Just I-- my colleague can give you, for example, the ideal temperature for the keyboards.

00:21:41,734 --> 00:21:41,954 [Speaker 5]

Yes.

00:21:41,954 --> 00:21:56,534 [Speaker 0]

After finished product, how much is the temperature? For example, in the storage bin of the finished product, how much we need the temperature. After the cooler, how much we-- is ideal temperature. Before the cooler is not important really.

00:21:57,554 --> 00:22:05,414 [Speaker 0]

The dryer, the, the coater, the extruder. For you really, this data not important. It's not important because-

00:22:05,414 --> 00:22:05,534 [Speaker 5]

Why?

00:22:05,534 --> 00:22:08,714 [Speaker 0]

...we need high temperature. We need high temperature.

00:22:08,714 --> 00:22:08,894 [Speaker 5]

Okay, understand.

00:22:08,894 --> 00:22:10,934 [Speaker 0]

It's more than hundred degrees.

00:22:10,934 --> 00:22:12,894 [Speaker 5]

I understand that. I understand.

00:22:12,894 --> 00:22:15,694 [Speaker 0]

Yeah, yeah, yeah. It's not important, this one.

00:22:19,634 --> 00:22:24,754 [Speaker 0]

Just after the cooler, because it's a finished product, we need to take care.

00:22:24,754 --> 00:22:27,834 [Speaker 5]

Maximum two point, uh, uh-

00:22:27,834 --> 00:22:28,314 [Speaker 0]

Two degrees.

00:22:28,314 --> 00:22:57,944 [Speaker 5]

Two degrees up ambience temperature. Because if you, you go quickly in the packaging with the, the humidity, with the, the temperature higher two point am-ambience, uh, temperature ambience, you have a moisture after sto-- after in warehouse. You have DLC also delay for sale. Okay. Don't have one eight, uh, well, uh, 18 months. 18 months.

00:22:57,944 --> 00:22:57,994 [Speaker 0]

18 months.

00:22:57,994 --> 00:23:00,014 [Speaker 5]

And don't have 18 months. Okay.

00:23:00,014 --> 00:23:00,554 [Speaker 0]

Of shelf, uh-

00:23:00,554 --> 00:23:14,044 [Speaker 5]

When you stock after with this-- when you, when you package, when you package with humidity or, or, or, uh, the, the, the, the, the, the, the [speaking native language].

00:23:14,044 --> 00:23:14,044 [Speaker 0]

[speaking native language]

00:23:14,044 --> 00:23:33,334 [Speaker 5]

[speaking native language] With the higher temperature than, than ambience. Higher five, uh, seven. You must have two point, okay? And all area you must, uh, um, uh, look my WhatsApp, uh, Mike, you understand me in English. I send you now WhatsApp, uh, what my inquiry.

00:23:35,234 --> 00:23:36,414 [Speaker 5]

Look my WhatsApp.

00:23:37,474 --> 00:23:48,464 [Speaker 5]

Uh, because I don't understand the, uh, uh, you don't pa-- talk about oxidation, about condensation or about, about, uh, uh,

00:23:49,494 --> 00:23:52,974 [Speaker 5]

about, uh, uh, [speaking native language]

00:23:52,974 --> 00:23:53,894 [Speaker 0]

Uh, bacteria.

00:23:53,894 --> 00:23:56,224 [Speaker 5]

No, not bacteria. [speaking native language]

00:23:57,734 --> 00:23:59,534 [Speaker 0]

Uh, moisture.

00:23:59,534 --> 00:24:01,534 [Speaker 5]

Moisture. Moisture.

00:24:01,534 --> 00:24:03,714 [Speaker 0]

Mm. Uh, I'll tell him.

00:24:08,434 --> 00:24:13,094 [Speaker 5]

Because this area is special. You know, you have...

00:24:15,754 --> 00:24:16,964 [Speaker 0]

Mm. Okay.

00:24:17,994 --> 00:24:23,214 [Speaker 0]

This one maybe we, uh, we invite one of our, uh...

00:24:24,922 --> 00:24:28,782 [Speaker 6]

能不能找一个这个比如说你懂点宠物料生产的这个-

00:24:28,782 --> 00:24:29,222 [Speaker 0]

你说。

00:24:29,222 --> 00:24:48,782 [Speaker 6]

这个专家，跟他们聊一下，是吧？因为说实话这东西它，我-我-我把这个他发在群里我给你看一下。很多东西可能还是跟生产实地相关的，比如说他说这个原料会不会就是盆化机边上啊，这个原料会不会受这个高温影响，这个这个什么乱七八糟的。

00:24:50,602 --> 00:25:02,542 [Speaker 6]

我觉得是不是找一个这个懂点生产的给他看一下，是吧？我觉得把他一些疑虑给他扫清楚嘛，他肯定还是有些疑虑现在。

00:25:04,882 --> 00:25:21,862 [Speaker 0]

Okay, I send your message in the group。I think maybe we invite one of the guys who is uh, uh, experience in the production discuss with you to clear all the, you know, all the aspect, all your doubt。

00:25:24,122 --> 00:25:24,402 [Speaker 6]

Okay。

00:25:24,402 --> 00:25:35,602 [Speaker 0]

Because our engineer, for example, Mr. Chu, he's only do for the process, but for production, for the raw material, these things and we are not very sure。

00:25:40,622 --> 00:25:42,022 [Speaker 6]

Okay, well, that's exactly what

00:25:43,042 --> 00:25:50,242 [Speaker 6]

Dr. Harry sent you in WhatsApp。That's our concern。So the environmental condition impact on the production。

00:25:52,342 --> 00:25:58,822 [Speaker 0]

Yes, he in-- he worry the environment affect the quality of the raw materials, you know。

00:25:58,822 --> 00:25:59,162 [Speaker 6]

Yes。

00:25:59,162 --> 00:26:07,622 [Speaker 0]

But for some raw material, definitely you need to storage in some heat sensitive material, especially like vitamins。

00:26:07,622 --> 00:26:07,642 [Speaker 6]

Yes。

00:26:07,642 --> 00:26:11,262 [Speaker 0]

Normally vitamins storage in the, in the air condition

00:26:12,282 --> 00:26:20,102 [Speaker 0]

room, you know, in the room with air conditioning。Maybe below twenty degrees like this。

00:26:24,542 --> 00:26:28,362 [Speaker 6]

So do you have a solution for that?

00:26:29,622 --> 00:26:38,302 [Speaker 0]

Yes, solution is in the storage。You, you keep one area, one-- because for vitamin is not a big amount。You keep one small area。

00:26:38,302 --> 00:26:51,002 [Speaker 6]

Yeah, I know, I know。 Yeah, we figure-- okay, we figure this, we figure this out。 We need a cooling area for vitamins and oils。 Okay, uh, no oil-

00:26:51,002 --> 00:26:56,102 [Speaker 0]

Because oil, oils to be friend, some oil they storage outside, you know with the sunshine。

00:26:56,102 --> 00:26:56,842 [Speaker 6]

Outside, yes。

00:26:57,882 --> 00:27:00,062 [Speaker 0]

Yeah, yeah, many oil they storage outside。

00:27:02,442 --> 00:27:08,332 [Speaker 6]

But if it oils when it's hot, it can be, it can turn out to be more viscous。

00:27:09,702 --> 00:27:17,282 [Speaker 0]

Uh, I think it's fine。 For the oil is fine, but I will check with our-- because in, for example, in Saudi Arabia, I think-

00:27:17,282 --> 00:27:17,302 [Speaker 6]

Yeah。

00:27:17,302 --> 00:27:22,882 [Speaker 0]

All the country is very hot, but the oil tank is outside。 Yeah, oil tank outside。

00:27:25,602 --> 00:27:34,442 [Speaker 6]

Okay, so, so, okay, your production engineer will uh, will uh, will join this meeting right now or you-

00:27:35,862 --> 00:27:48,592 [Speaker 0]

No, no, we need to maybe join one of our client who is uh, you know, professional for production, and he will tell us which part you need to care。 You need to take care the temperature。

00:27:48,592 --> 00:27:48,622 [Speaker 6]

Okay。

00:27:48,622 --> 00:28:13,482 [Speaker 0]

Yeah。 But in my opinion, now I think for the cooling area, because cooling area farm standard is normally three degree above the ambient temperature。 If you want to do less like two point five or two, maybe we need to have inject the cool air, not the ambient air。 Yeah。

00:28:13,482 --> 00:28:21,142 [Speaker 6]

Okay。 And, and there is another issue, humidity, relative humidity, humidity, moisture。

00:28:22,542 --> 00:28:29,202 [Speaker 0]

Humidity is a dryer。 The dryer will work to take out all the humidity。

00:28:29,202 --> 00:28:34,902 [Speaker 6]

Okay, I have a question for the dryer。 Does the dryer has a sensor for humidity?

00:28:36,662 --> 00:28:38,002 [Speaker 0]

Dryer, yeah, we have。

00:28:39,782 --> 00:28:40,562 [Speaker 6]

I didn't see it。

00:28:40,562 --> 00:28:54,502 [Speaker 0]

For the dryer, yeah, for the dryer also after the product production, you should have an laboratory to check all the results, to follow all the results。You cannot follow the sensor only, yeah。

00:28:54,502 --> 00:28:59,082 [Speaker 6]

Okay, including, including moisture in the kibble?

00:28:59,082 --> 00:29:01,722 [Speaker 0]

Uh, the moisture。

00:29:02,962 --> 00:29:14,102 [Speaker 0]

哎, 我们那个有湿度传感器吗? 烘干机。它不能测, 它只能测这个空气的湿度吧, 是吧? 杜老师。

00:29:14,102 --> 00:29:16,322 [Speaker 7]

呃, 我先来。

00:29:17,342 --> 00:29:19,982 [Speaker 7]

以烘干我们就是这样的。

00:29:19,982 --> 00:29:20,842 [Speaker 0]

啊。

00:29:22,462 --> 00:29:25,421 [Speaker 7]

它, 它需不需要有一个湿度传感器是吧?

00:29:25,422 --> 00:29:29,361 [Speaker 6]

我觉得它, 我们其实-

00:29:29,582 --> 00:29:29,732 [Speaker 7]

它确实要加。

00:29:29,732 --> 00:29:38,862 [Speaker 6]

它也是, 它只, 它只能测这个, 就是空气的这个湿度吧, 它不能测这个, 就是产品的湿度, 对吧?

00:29:38,862 --> 00:29:39,142 [Speaker 7]

不能。

00:29:40,362 --> 00:29:43,062 [Speaker 7]

对, 不能测产品的湿度。测不, 测不了。

00:29:43,062 --> 00:29:50,582 [Speaker 0]

No, for the, for the kibble, no, for the kibble we can。Kibble moisture normally should be tested in the, in the laboratory。

00:29:52,042 --> 00:29:53,902 [Speaker 6]

Oh, really?

00:29:53,902 --> 00:30:11,602 [Speaker 0]

Yeah, yeah。Because the sensor cannot, you know, for the kibble, the moisture normally you should have a special, have a special equipment to extract all the moisture to see the percentage。You know, it's a, it's a complete-

00:30:11,602 --> 00:30:12,342 [Speaker 6]

Yeah。

00:30:12,342 --> 00:30:25,942 [Speaker 0]

You cannot-- the sensor just can sense the air , the air moisture。 It cannot take the moisture in the kibbles。 Yeah。 For the kibbles , they , they need a special laboratory equipment。

00:30:25,942 --> 00:30:38,522 [Speaker 6]

You work , you work about humidity in the kibble。 If you have humidity in the kibble。 I , I , I explain you why , why example , okay? Maybe Mr. Sun interpret for me , okay。

00:30:40,142 --> 00:30:52,202 [Speaker 5]

When you have the, the, the fat, the, the, the lipid, okay, with a higher temperature in the warehouse or, or in the warehouse or the ne- or near the extruder, okay. The, the, the-

00:30:52,202 --> 00:30:52,272 [Speaker 8]

Yeah.

00:30:52,272 --> 00:30:56,922 [Speaker 5]

Liquid, uh, uh, will, uh, become very liquid. The lipid becomes-

00:30:56,922 --> 00:31:00,162 [Speaker 8]

Yeah, yeah. It becomes more viscous, uh, liquid.

00:31:00,162 --> 00:31:12,002 [Speaker 5]

Yeah, yeah. Okay. When you put it in the, the, the... When you put it in the, uh, uh, pre-extruder, okay, and you mix, and you put it in the extruder, the, the, the, the, uh-

00:31:12,002 --> 00:31:12,842 [Speaker 8]

The kibble.

00:31:12,842 --> 00:31:20,422 [Speaker 5]

The kibble. The kibble, it's not, uh, it's not, uh, completely, uh, correct. Okay. Because you push, uh... What? Yeah. Let me see.

00:31:20,422 --> 00:31:22,342 [Speaker 8]

Yeah. It doesn't come out, uh-

00:31:22,342 --> 00:31:23,082 [Speaker 5]

Okay.

00:31:23,082 --> 00:31:26,622 [Speaker 8]

Uh, uh, in the right, uh-

00:31:26,622 --> 00:31:27,742 [Speaker 5]

It removes. It removes.

00:31:27,742 --> 00:31:30,502 [Speaker 8]

Uh, yeah. It's, it's kind of like, uh, soft.

00:31:30,502 --> 00:32:02,162 [Speaker 5]

Okay, okay. And when you go the, the extruder, you go in, in, in dryer. Okay. In dryer you have time for, for, for, uh, for drying. Okay. You have time. Okay. Uh, with Mikos. Okay. You have time, uh, for drying, but you don't know the, the, the, the kibble coming with the, uh, uh, humidity because, because the, because the, the, the lipid is not, is, uh, is, is, is, um, is, uh, upper, uh, liquid.

00:32:02,162 --> 00:32:02,362 [Speaker 8]

Yeah.

00:32:02,362 --> 00:32:19,222 [Speaker 5]

Up liquid because temperature unpacks. Okay. The temperature. Arrive in dryer, you have maybe you have, uh, two minutes for dryer. Okay. When it come in dryer, dryer qui-- Um, um, um, uh, say the dryer.

00:32:19,222 --> 00:32:20,272 [Speaker 8]

The dryer.

00:32:20,272 --> 00:32:22,582 [Speaker 5]

The dryer, it just in, in the surface. Surface.

00:32:22,582 --> 00:32:27,452 [Speaker 8]

Yeah. So the kibble is not completely dry. The moisture hasn't been-

00:32:27,452 --> 00:32:28,142 [Speaker 5]

[on the phone] Not moisture.

00:32:29,622 --> 00:32:31,402 [Speaker 5]

The lipid. The, the, the humidity inside.

00:32:33,402 --> 00:32:53,582 [Speaker 5]

Yeah. Yeah. It's like the kibble is not completely dry, only on the surface, not inside. Okay. You, you, you, you stay... You m- you must do, you must do order in the dryer. You told him, "Okay, not two minutes, for example, five minutes." You must do five minutes because you have humidity in the, in, in, in, uh, in, inside.

00:32:53,582 --> 00:32:55,372 [Speaker 8]

Inside, inside the, the kibble.

00:32:55,372 --> 00:33:07,291 [Speaker 5]

The kibble. When you go for normal program, normal program, it go out dryer, it come in, in a, in a, in a, in a coating. Okay. The coating.

00:33:07,291 --> 00:33:07,321 [Speaker 8]

Oh.

00:33:07,322 --> 00:33:35,662 [Speaker 5]

The coat... Okay. You have a coat, uh, vacuum. In a vacuum. Okay. The vacuum, when you have also the Appeton product liquid, uh, powder. Yeah. Okay. With lot of temperature ambiance. Okay. Okay. But you, you, you... The, the spray, the vacuum, it just stay in sur- in, in the surface, the, the kibble, okay? And not until you enter the pocket. Okay. And you go after-

00:33:35,662 --> 00:33:35,902 [Speaker 8]

No.

00:33:35,902 --> 00:33:36,622 [Speaker 5]

Humidity.

00:33:36,622 --> 00:33:37,041 [Speaker 8]

No.

00:33:37,042 --> 00:33:38,002 [Speaker 5]

With the, with the...

00:33:41,402 --> 00:33:42,322 [Speaker 8]

Uh, sticky.

00:33:42,322 --> 00:34:16,962 [Speaker 5]

Sticky. Uh, the, the, the spray is just, uh, sticky. It's not correct, okay, in the, in the, in the, the kibble. And you go quickly in, in cooling. In cooling system. Cooling system you don't have idea about what, what you re- uh, what... It receive a problem. Okay. It's because it's not automatically, um, um, preventive and, uh, the system, uh, not pre-preventive. You have just th- th-this, this kind of pocket with humidity and no good spray. Okay. Is, uh, column, column, uh, uh,

00:34:18,422 --> 00:34:19,082 [Speaker 5]

column.

00:34:19,082 --> 00:34:20,682 [Speaker 8]

Sticky.

00:34:20,682 --> 00:35:03,802 [Speaker 5]

It's sticky. You have the sticky. You go quickly in the packing. You have a packing when you, when you look area packing, you look... You don't have ambient, am-ambient temperature security because you have humidity. You have also... It must, it must to, to, to, to close this area packings. If, because if you put this, this, this kibble, uh, with, with, with this problem, and you give it ambiance humidity, and, and you, you, you, you, you, you, you close the packaging, and you're putting this in the warehouse with the hot temperature, with... You don't have, uh, pet food. [laughs] You don't have, uh-

00:35:03,802 --> 00:35:05,262 [Speaker 8]

Ah.

00:35:05,262 --> 00:35:05,802 [Speaker 5]

You don't have pet food.

00:35:05,802 --> 00:35:06,402 [Speaker 8]

Doctor, you know.

00:35:07,582 --> 00:35:33,062 [Speaker 8]

Doctor, my idea, you know, because now everything is, uh, just our imagination. Why we don't do the practice, the production first, and we see. I, I believe if we solve the, the cooler, the cooling air problem, we don't have other issues, really. It's my experience. For extruder, dryer, the machine will adjust, and we will teach your engineer how to adjust.

00:35:34,222 --> 00:35:35,322 [Speaker 8]

Okay, Mike-

00:35:35,322 --> 00:35:40,842 [Speaker 5]

But, but what, uh, I want to adapt, but, but, uh, with system. Give me the system.

00:35:40,842 --> 00:35:42,502 [Speaker 8]

Mike, Mike. We don't-

00:35:42,502 --> 00:35:42,681 [Speaker 5]

Yeah.

00:35:42,682 --> 00:35:48,522 [Speaker 8]

We don't want to adjust things manually. We want to be ev- automated. Where you-

00:35:48,522 --> 00:35:49,682 [Speaker 5]

Yeah, it's automated. Yeah.

00:35:50,762 --> 00:35:51,242 [Speaker 8]

It will-

00:35:51,242 --> 00:35:51,422 [Speaker 5]

Yeah, automated.

00:35:51,422 --> 00:36:04,612 [Speaker 8]

Talk to the machine. Send, send, send the... Okay. It will tell the dryer, "Well, slow down." Uh, so the kibble will spend more time than dry to come out exactly like it's supposed to be. Do you see what I'm saying?

00:36:04,612 --> 00:36:04,672 [Speaker 5]

Yeah, yeah. We-

00:36:04,672 --> 00:36:06,962 [Speaker 8]

We don't want, we don't want manual things.

00:36:06,962 --> 00:36:07,442 [Speaker 5]

We have this function.

00:36:07,442 --> 00:36:09,082 [Speaker 8]

Touch screen. Touch the technician.

00:36:09,082 --> 00:36:09,452 [Speaker 5]

It's, it's automated.

00:36:09,452 --> 00:36:11,102 [Speaker 8]

Slow down. We want-

00:36:11,102 --> 00:36:14,022 [Speaker 5]

Yeah, same. It's, it's automated. This is automated.

00:36:14,022 --> 00:36:15,942 [Speaker 8]

Automated. But we-

00:36:15,942 --> 00:36:17,752 [Speaker 5]

Yeah, yeah. We will-

00:36:17,752 --> 00:36:26,742 [Speaker 8]

It needs to read, it needs to read all the data, like outside temperature, uh, inside temperature with the machine, all the data points. Temperature, humidity, uh-

00:36:26,742 --> 00:36:27,702 [Speaker 5]

Cool.

00:36:27,702 --> 00:36:29,282 [Speaker 8]

Steam pressure, and so on.

00:36:30,602 --> 00:36:32,061 [Speaker 8]

So does your system do that?

00:36:32,062 --> 00:36:32,842 [Speaker 5]

It's, uh...

00:36:33,882 --> 00:36:34,862 [Speaker 5]

The system-

00:36:34,862 --> 00:36:34,931 [Speaker 8]

Cooling.

00:36:34,931 --> 00:36:46,352 [Speaker 5]

Do that, but the system, I tell you frankly, cannot check the humidity of the kibbles. If you can check, for example, the... You know, when you produce, if you... We will tell your engineer, "Okay, uh-"

00:36:46,630 --> 00:36:50,710 [Speaker 0]

The product come out of the dryer, which fun-- which status is good.

00:36:52,370 --> 00:36:55,990 [Speaker 0]

You need to-- your, your engineer also need to learn, you know.

00:36:57,030 --> 00:37:02,370 [Speaker 0]

You cannot, uh, rely everything, even the most, most, most advanced one.

00:37:02,370 --> 00:37:02,849 [Speaker 1]

[laughs]

00:37:02,849 --> 00:37:15,850 [Speaker 0]

The pet food. You cannot rely everything on the machine. [baby crying] Yes, engineer should be, should be understand. They should understand how to operate the machine, how to adjust the machine, how to adjust the map-

00:37:15,850 --> 00:37:15,870 [Speaker 1]

Okay.

00:37:15,870 --> 00:37:17,370 [Speaker 0]

How to adjust the, the speed.

00:37:18,830 --> 00:37:21,430 [Speaker 0]

Need to know. You need to understand. Yeah.

00:37:21,430 --> 00:37:25,070 [Speaker 1]

We understand, uh, I totally understand, but we want this to be automated.

00:37:26,830 --> 00:37:29,200 [Speaker 0]

Yeah, it's automated, Sam. It's automated.

00:37:29,200 --> 00:37:29,230 [Speaker 1]

Okay.

00:37:29,230 --> 00:37:30,870 [Speaker 0]

Even you can save your formulation.

00:37:32,010 --> 00:37:33,230 [Speaker 0]

Yeah. For example-

00:37:33,230 --> 00:37:33,490 [Speaker 1]

Okay.

00:37:33,490 --> 00:37:35,010 [Speaker 0]

Yeah, if you produce the cat...

00:37:36,410 --> 00:37:43,950 [Speaker 0]

You can save your formulation, save your setting, save your data. So sometime if you produce the same, you just, uh, you know,

00:37:45,250 --> 00:37:48,970 [Speaker 0]

input the same information. It's, uh, automated.

00:37:49,030 --> 00:37:54,570 [Speaker 1]

Okay. All right. And the moisture should be measured by, by our quality controller.

00:37:56,350 --> 00:38:13,690 [Speaker 0]

Yeah. The moisture, the item of the protein, the item of dry matter or fat. You should have a equipment to test. You cannot rely on the ma-- the machine, because the machine cannot break the pebbles to check out how much moisture inside.

00:38:13,690 --> 00:38:22,470 [Speaker 1]

Yeah, yeah, I understand that. I have moisture, the final [crosstalk] moisture, after you stop. Okay. That's the first.

00:38:22,470 --> 00:38:31,770 [Speaker 0]

Ah, doctor, I-- doctor, I, I tell you, don't, don't, uh, don't worry about this really, doctor. Sorry to interrupt. Don't worry about this.

00:38:33,330 --> 00:38:33,880 [Speaker 1]

Uh, the moisture-

00:38:33,880 --> 00:38:39,370 [Speaker 0]

Our engineer will teach your engineer how to adjust the dryer, how to adjust the extruder.

00:38:40,410 --> 00:38:41,250 [Speaker 0]

But it's not manual.

00:38:41,250 --> 00:38:41,410 [Speaker 1]

Okay.

00:38:41,410 --> 00:38:44,840 [Speaker 0]

It's automatic. Yeah, automated. Our engineer will train your engineer.

00:38:44,840 --> 00:38:45,550 [Speaker 1]

From the control-

00:38:45,550 --> 00:38:46,940 [Speaker 0]

Yeah, how to do it.

00:38:46,940 --> 00:38:49,880 [Speaker 1]

From the control, from, from the control center, right?

00:38:51,090 --> 00:38:58,190 [Speaker 0]

Yeah, yeah. We have a control panel for the dryer. We have a control panel for extruder. We will teach you how to adjust. Yeah.

00:38:59,910 --> 00:39:03,310 [Speaker 1]

But we also have a control center where they see the whole process.

00:39:04,770 --> 00:39:07,730 [Speaker 0]

Yeah, you have sensor. You have temperature sensor, uh-

00:39:07,730 --> 00:39:08,930 [Speaker 1]

Not sensor, center.

00:39:10,770 --> 00:39:10,870 [Speaker 0]

What is center?

00:39:10,870 --> 00:39:11,770 [Speaker 1]

The control room.

00:39:12,850 --> 00:39:13,850 [Speaker 1]

The control room.

00:39:13,850 --> 00:39:17,210 [Speaker 0]

Yeah, yeah. You have a center. Yeah, yeah. A control center control also.

00:39:18,230 --> 00:39:20,190 [Speaker 0]

In the control

00:39:22,690 --> 00:39:22,920 [Speaker 0]

room.

00:39:22,920 --> 00:39:25,190 [Speaker 6]

[background chattering]

00:39:25,190 --> 00:39:25,470 [Speaker 0]

[laughs]

00:39:26,710 --> 00:39:26,959 [Speaker 6]

[laughs]

00:39:26,959 --> 00:39:26,959 [Speaker 0]

[laughs]

00:39:26,959 --> 00:40:57,890 [Speaker 6]

[background chattering]

00:40:57,890 --> 00:40:58,070 [Speaker 0]

Okay.

00:41:25,310 --> 00:41:32,290 [Speaker 6]

Customer掉线了。哎，客户

00:41:34,730 --> 00:41:37,290 [Speaker 6]

是不是掉线了？

00:41:37,290 --> 00:41:39,190 [Speaker 1]

Hi, where is Mike?

00:41:39,190 --> 00:41:44,010 [Speaker 6]

魏老-魏老师掉线了。我-我找一下他，他可能接电话了还是干什么了。

00:41:44,010 --> 00:41:47,130 [Speaker 0]

Maybe he's calling, someone calling in-

00:41:47,130 --> 00:41:50,150 [Speaker 1]

Okay. Okay. Okay. Let's wait for him. Thank you.

00:42:17,430 --> 00:42:17,610 [Speaker 0]

Hello?

00:42:21,270 --> 00:42:22,210 [Speaker 1]

I'm Mike.

00:42:22,210 --> 00:42:25,130 [Speaker 0]

My, my phone is out of power.

00:42:25,130 --> 00:42:26,850 [Speaker 1]

No problem. [laughs]

00:42:26,850 --> 00:42:38,990 [Speaker 0]

You are, you are, you know, very, uh, I think nervous about this, uh, because this is-- maybe this is new for you, but I'm sure our machinery can adjust, uh, very, very well.

00:42:41,150 --> 00:42:43,570 [Speaker 1]

No, no, I'm not nervous. I'm just concerned. That's it.

00:42:43,570 --> 00:42:45,130 [Speaker 0]

Yeah. No need to be concerned.

00:42:45,130 --> 00:42:46,210 [Speaker 1]

I just wanna make sure it, uh-

00:42:47,790 --> 00:42:48,390 [Speaker 0]

Before the-

00:42:48,390 --> 00:42:49,530 [Speaker 1]

I just wanna make sure.

00:42:49,530 --> 00:42:49,830 [Speaker 0]

Yeah.

00:42:51,350 --> 00:42:54,210 [Speaker 0]

And the-Yes.

00:42:54,210 --> 00:42:55,290 [Speaker 1]

Okay, Mike.

00:42:55,290 --> 00:42:55,430 [Speaker 0]

Yeah.

00:42:55,430 --> 00:42:55,650 [Speaker 1]

Mike.

00:42:57,590 --> 00:43:06,529 [Speaker 1]

Okay, now, now you re-- assure me, assure us, actually assure Dr. Hadi. He's, he's concerned more than me. [laughs]

00:43:06,530 --> 00:43:08,650 [Speaker 0]

I know doctor is very concerned.

00:43:08,650 --> 00:43:15,370 [Speaker 1]

Yeah. [laughs] You, you, you're assuring us that the, th-there should be any problem, okay?

00:43:15,370 --> 00:43:16,190 [Speaker 0]

Yeah.

00:43:16,190 --> 00:43:26,370 [Speaker 1]

And now you said you found a company that, that, that can do the ventilation, uh, and, uh, cooling and everything, right?

00:43:27,790 --> 00:43:34,290 [Speaker 0]

Yeah. We, we are looking for this, uh, solution. But maybe from Morocco also we can find maybe.

00:43:34,290 --> 00:43:35,169 [Speaker 1]

No.

00:43:35,170 --> 00:43:35,470 [Speaker 0]

Simple.

00:43:35,470 --> 00:43:38,990 [Speaker 1]

But it... Does, does that company

00:43:40,070 --> 00:43:50,669 [Speaker 1]

have experience in a pet food industry and in a production, in a manufacturer like, like pet food like yours, like Farmsound equipment and so on?

00:43:50,670 --> 00:44:00,040 [Speaker 0]

Uh, no, no. This, uh, this air cooling, they just consider reduce the... You know, to refresh the air. Not for production anything, you know.

00:44:00,040 --> 00:44:00,050 [Speaker 1]

Okay.

00:44:00,050 --> 00:44:03,590 [Speaker 0]

Don't produce anything. It's, uh, it's not very important for them.

00:44:06,030 --> 00:44:13,870 [Speaker 1]

Okay, but how they gonna do the, the design and how the, the... what they call them? The, the pipelines, how are they gonna design all that?

00:44:15,810 --> 00:44:17,150 [Speaker 0]

Uh, this one is, uh,

00:44:18,290 --> 00:44:27,190 [Speaker 0]

not clear now. Later we will find, uh... I think for us, yeah, I'm looking for the solution for the cooler. For the cooler, cooler part.

00:44:29,870 --> 00:44:34,090 [Speaker 0]

You get my point? For the cooler, maybe we, we close the area.

00:44:34,090 --> 00:44:34,270 [Speaker 1]

Mike.

00:44:34,270 --> 00:44:35,850 [Speaker 0]

Reduce the-

00:44:35,850 --> 00:44:38,680 [Speaker 1]

Mike, Mike, Mike.

00:44:38,680 --> 00:44:38,680 [Speaker 0]

Yes.

00:44:38,680 --> 00:45:29,650 [Speaker 1]

Mike. Mike, [in Arabic] Okay. Let me translate what Dr. Hadi just told me. He said he would like Farmsound to tell us exactly from the beginning of the, uh, process to the end, you know, what, what, what, uh, what, uh, uh, uh,

00:45:31,130 --> 00:45:48,730 [Speaker 1]

temperature environment should be for each step. Okay? Because if we go to, uh, HVAC, uh, or air conditioning or, uh, company, they will not know. They're just gonna put so many, uh, so many... what do you call them? Uh,

00:45:49,750 --> 00:46:22,650 [Speaker 1]

the, the, the air cooling system all over the, the warehouse and, uh, just, uh, without understanding the process. If, if Farmsound, if, uh, you guys tell us, "All right, this is the condition of the environment of the raw materials. This is the condition of the mixer. This is the condition around the extruder. This is the condition around the dryer, and this is the condition around the co-coating and cooling all the way to the end of the packaging area." So that's what exact-- That's what Dr. Hadi is asking for.

00:46:22,650 --> 00:46:27,610 [Speaker 0]

Okay. This one, uh, I ask my engineer, our engineer to mark in the map

00:46:28,630 --> 00:46:30,890 [Speaker 0]

in a different zone. We mark it to-

00:46:30,890 --> 00:46:31,730 [Speaker 1]

Okay.

00:46:31,790 --> 00:46:34,310 [Speaker 0]

Yeah. Different zone, different temperature, and send to you.

00:46:35,650 --> 00:46:36,270 [Speaker 1]

Okay.

00:46:36,270 --> 00:46:37,109 [Speaker 0]

Yeah.

00:46:37,109 --> 00:46:41,780 [Speaker 1]

[in Arabic]

00:46:41,780 --> 00:46:41,790 [Speaker 0]

Yeah.

00:46:41,790 --> 00:46:53,710 [Speaker 1]

[in Arabic]

00:46:55,770 --> 00:46:56,450 [Speaker 0]

Yeah.

00:46:56,450 --> 00:47:20,220 [Speaker 1]

[in Arabic] Okay. So, uh, what Dr. Hadi just said, [clear throat] we want to read the temperature, humidity a-around each zoning, okay? Because we have like four, five zone in the production line. [in Arabic]

00:47:22,130 --> 00:47:22,270 [Speaker 0]

Mm.

00:47:22,270 --> 00:47:27,890 [Speaker 1]

And how do we control the, the cooling system or air, air cooling system

00:47:29,090 --> 00:47:40,110 [Speaker 1]

where with the, with the readings, with sensors, not sensors around the machine, e-externals in the warehouse, so the Mikos system can read it and adjust automatically.

00:47:41,830 --> 00:47:42,750 [Speaker 1]

Does that make sense to you?

00:47:43,790 --> 00:47:53,910 [Speaker 0]

This one I think, uh, little bit hard because, uh, uh, it's many, many, many, many equipment. We cannot put every part. Uh,

00:47:55,150 --> 00:48:04,950 [Speaker 0]

and also even, even we put the sensor, we cannot, uh, adjust automatically. Just it can give you this, uh, data. How is the temperature. How

00:48:07,590 --> 00:48:09,010 [Speaker 0]

it adjust automatically.

00:48:09,010 --> 00:48:09,950 [Speaker 1]

[in Arabic]

00:48:15,390 --> 00:48:19,430 [Speaker 1]

Okay. Uh, it looks like, uh, uh, on your website you have a software

00:48:21,010 --> 00:48:28,730 [Speaker 1]

that, that does that. Like a preventive, uh, uh, uh, it reads the, uh, from all the data

00:48:30,090 --> 00:48:44,890 [Speaker 1]

i-in-inside the machine and outside the m-- uh, and the, the, uh, warehouse and, uh, reacts quickly with some, uh, intelligence and adjust, uh, the production line. You have a Mikos TM something.

00:48:46,070 --> 00:48:46,590 [Speaker 1]

It's called Mikos TM.

00:48:46,590 --> 00:48:50,730 [Speaker 0]

Yeah. But it's not for temperature wise. It's not for temperature.

00:48:53,010 --> 00:48:53,770 [Speaker 1]

What is it for?

00:48:55,190 --> 00:49:04,350 [Speaker 0]

It's just for maybe increase the efficiency of the, you know, manage the data with your order like this. It's not, uh, for adjust the environment.

00:49:05,510 --> 00:49:09,670 [Speaker 0]

For environment, I don't think we have a solution with our software.

00:49:09,670 --> 00:49:12,350 [Speaker 1]

So you're saying your system is for like an ERP?

00:49:13,660 --> 00:49:21,510 [Speaker 0]

Yeah, like ERP or SAP to also, you know, uh, it's a management system more to increase-

00:49:21,510 --> 00:49:22,590 [Speaker 1]

No, no, we're talking-

00:49:22,590 --> 00:49:23,180 [Speaker 0]

...your efficiency.

00:49:23,180 --> 00:49:23,640 [Speaker 1]

No. Okay.

00:49:25,180 --> 00:49:30,040 [Speaker 1]

No. Is it an ERP or is it, uh, for the production line?

00:49:32,700 --> 00:49:43,220 [Speaker 0]

It's like a ERP. Also we have the like a twin, digital twin system. But this digital twin system also is not, is not for environment. This is not for environment.

00:49:44,420 --> 00:49:45,240 [Speaker 1]

Okay.

00:49:45,240 --> 00:49:53,160 [Speaker 0]

Yeah. This is also for like e-efficiency, increase efficiency of production. No relation with the environment.

00:49:53,160 --> 00:49:57,430 [Speaker 1]

Yeah, I know. Okay, so i-it's like a twin, uh, what do you call it? Twin, uh,

00:49:58,640 --> 00:50:03,400 [Speaker 1]

twin, uh, factory or, uh, what? No. Digital twin factory.

00:50:03,400 --> 00:50:09,280 [Speaker 0]

Yeah. Digital twin. Also you can like review with your mobile phone like this, you know, at your home.

00:50:09,280 --> 00:50:12,000 [Speaker 1]

And you, and you can do simulations, right?

00:50:12,000 --> 00:50:22,500 [Speaker 0]

Yeah, but this one is not included in our scope. You know, it's another, another function. We need to... Yeah. I think for, for the moment, it's not necessary really.

00:50:23,640 --> 00:50:23,900 [Speaker 1]

Why?

00:50:27,020 --> 00:50:37,220 [Speaker 0]

You know this one? I tell you frankly, if we-- because digital twin system also including many, many blocks, many, many... You need to know-- tell me which function you want,

00:50:38,860 --> 00:50:41,440 [Speaker 0]

which function, which, uh, purpose you want to reach,

00:50:43,080 --> 00:50:43,640 [Speaker 0]

and then we-

00:50:43,640 --> 00:50:44,320 [Speaker 1]

For optimization.

00:50:44,320 --> 00:50:48,240 [Speaker 0]

It's, it's priced by, uh, block, by module, module, you know, different module.

00:50:49,300 --> 00:50:49,970 [Speaker 0]

By different function.

00:50:51,400 --> 00:50:53,000 [Speaker 1]

Mike, it's for optimization.

00:50:54,240 --> 00:50:55,960 [Speaker 1]

That's for optimization.

00:50:57,420 --> 00:51:00,160 [Speaker 0]

Yeah. Optimization. Yes. It's like optimize-

00:51:00,160 --> 00:51:01,280 [Speaker 1]

Okay.

00:51:01,280 --> 00:51:13,190 [Speaker 0]

To increase the efficiency. But this one I have to keep the price separately. I don't know, doctor. Later I give, okay, it's a half million dollar. Doctor say, "Oh, you are crazy. You are, you are not a partner." You are--

00:51:14,320 --> 00:51:15,290 [Speaker 0]

He angry, you know,

00:51:16,420 --> 00:51:18,480 [Speaker 0]

and you give me crazy high price.

00:51:20,660 --> 00:51:22,460 [Speaker 1]

Okay. Mike.

00:51:22,460 --> 00:51:22,579 [Speaker 0]

Yeah.

00:51:22,580 --> 00:51:49,340 [Speaker 1]

That's what Dr. Hadi is asking for. He wants, uh, we, uh, the digital twin, uh, factory system for optimization, you know, in reducing energy and, uh, increasing quality of the cable. You know what I'm saying? So you said it's not included in the scope of work. You can talk, uh, separately with Dr. Hadi about that. Then-

00:51:49,340 --> 00:51:51,060 [Speaker 9]

Simulation.

00:51:51,060 --> 00:51:51,910 [Speaker 1]

No, no.

00:51:51,910 --> 00:51:55,250 [Speaker 9]

[speaking foreign language]

00:51:56,980 --> 00:51:58,860 [Speaker 1]

Okay. So, so-

00:51:58,860 --> 00:52:00,320 [Speaker 9]

[speaking foreign language]

00:52:00,320 --> 00:52:01,140 [Speaker 1]

So, Dr. Hadi-

00:52:01,140 --> 00:52:19,140 [Speaker 0]

[speaking foreign language]

00:52:19,140 --> 00:52:34,860 [Speaker 9]

[speaking foreign language]

00:52:34,860 --> 00:53:02,620 [Speaker 0]

You know, uh, our engineer said, uh, normally this function we should, uh, uh, consider design from beginning. And for the modification, it's not that easy because all the, you know, all the, all the function normally is, is already fixed. The space to improve is not, uh, too much. And we have, uh, also we need to maybe, uh, redo the, all the control.

00:53:10,560 --> 00:53:10,800 [Speaker 1]

Okay.

00:53:41,960 --> 00:55:05,490 [Speaker 9]

[speaking foreign language]

00:55:05,490 --> 00:55:09,450 [Speaker 1]

[speaking foreign language]

00:55:09,450 --> 00:55:09,950 [Speaker 9]

[speaking foreign language]

00:55:09,950 --> 00:55:09,950 [Speaker 1]

[speaking foreign language]

00:55:09,950 --> 00:55:13,630 [Speaker 9]

[speaking foreign language]

00:55:13,630 --> 00:55:13,630 [Speaker 0]

[speaking foreign language]

00:55:13,630 --> 00:55:13,630 [Speaker 9]

[speaking foreign language]

00:55:13,630 --> 00:55:13,630 [Speaker 0]

[speaking foreign language]

00:55:13,630 --> 00:55:13,630 [Speaker 9]

[speaking foreign language]

00:55:13,630 --> 00:55:13,630 [Speaker 0]

[speaking foreign language]

00:55:13,630 --> 00:55:13,630 [Speaker 9]

[speaking foreign language]

00:55:13,630 --> 00:55:13,630 [Speaker 0]

[speaking foreign language]

00:55:13,630 --> 00:55:13,630 [Speaker 9]

[speaking foreign language]

00:55:13,630 --> 00:55:13,630 [Speaker 0]

[speaking foreign language]

00:55:13,630 --> 00:55:13,630 [Speaker 9]

[speaking foreign language]

00:55:13,630 --> 00:55:13,630 [Speaker 0]

[speaking foreign language]

00:55:13,630 --> 00:55:13,630 [Speaker 9]

[speaking foreign language]

00:55:13,630 --> 00:55:13,630 [Speaker 0]

[speaking foreign language]

00:55:13,630 --> 00:55:13,630 [Speaker 9]

[speaking foreign language]

00:55:13,630 --> 00:55:13,630 [Speaker 0]

[speaking foreign language]

00:55:13,630 --> 00:55:13,630 [Speaker 9]

[speaking foreign language]

00:55:13,630 --> 00:55:13,630 [Speaker 0]

[speaking foreign language]

00:55:13,630 --> 00:55:13,630 [Speaker 9]

[speaking foreign language]

00:55:13,630 --> 00:55:13,630 [Speaker 0]

[speaking foreign language]

00:55:13,630 --> 00:55:13,630 [Speaker 9]

[speaking foreign language]

00:55:13,630 --> 00:55:13,630 [Speaker 0]

[speaking foreign language]

00:55:13,630 --> 00:55:13,630 [Speaker 9]

[speaking foreign language]

00:55:41,090 --> 00:55:42,490 [Speaker 1]

Hey, Mike.

00:55:42,490 --> 00:55:43,230 [Speaker 0]

Hi, Sam.

00:55:44,310 --> 00:55:47,030 [Speaker 1]

Yeah. Okay. So

00:55:49,350 --> 00:55:50,670 [Speaker 1]

just to summarize.

00:55:51,770 --> 00:55:52,170 [Speaker 0]

Yes.

00:55:52,170 --> 00:55:52,470 [Speaker 1]

Okay.

00:55:53,630 --> 00:55:54,480 [Speaker 1]

You said that

00:55:56,710 --> 00:55:56,790 [Speaker 1]

the,

00:55:58,370 --> 00:55:58,540 [Speaker 1]

the,

00:55:59,810 --> 00:56:02,390 [Speaker 1]

the production line will, will have no issues,

00:56:03,470 --> 00:56:10,230 [Speaker 1]

uh, of external temperature and so on, as, as long as we maintain ambient, uh, environment, uh, in the warehouse.

00:56:10,230 --> 00:56:12,930 [Speaker 0]

Yes. Yes, yes.

00:56:12,930 --> 00:56:17,030 [Speaker 1]

It, it is our responsibility to set up the system of air conditioning, right?

00:56:19,210 --> 00:56:24,110 [Speaker 0]

Yeah. It's, uh... Normally, yeah. It's, uh, your responsibility.

00:56:24,110 --> 00:56:44,930 [Speaker 1]

Okay. All right. Dr. Hadi said, can you at least give us some, uh, like, uh, some blueprints? This is the, this, well, this is the temperature and, uh, of this area, raw materials, uh, second zone, uh, extruder area, uhhh, dryer, cooling, packaging.

00:56:46,010 --> 00:56:51,360 [Speaker 1]

I know the finished goods. We know, uh, what we need to do. That's it. Don't worry about it. Okay?

00:56:51,360 --> 00:56:51,410 [Speaker 0]

Okay.

00:56:51,410 --> 00:57:02,300 [Speaker 1]

So when, when we, when we talk to the company that's, that's gonna install the HVAC, we know exactly what to tell them. Do you see what I'm saying? Because what the-

00:57:02,300 --> 00:57:02,300 [Speaker 0]

Oh, okay.

00:57:02,300 --> 00:57:17,850 [Speaker 1]

... the consulting company, which you, you already know, I forgot in, uh, their name, Indigis, they already proposed a, a, a blueprint, but we're not sure if it's, uh, good or not, if it's adequate to, uh, to your, uh, to the, uh, to the factory.

00:57:19,350 --> 00:57:23,150 [Speaker 0]

Uh, they give a proposal for the HVAC system, right?

00:57:23,150 --> 00:57:35,339 [Speaker 1]

Yes. We have an HVAC proposal, but we're not... When, uh, uh, I don't think they did it for just a warehouse, not a factory. Just for the building. [laughs] Do you understand?

00:57:35,339 --> 00:57:35,630 [Speaker 0]

Oh, okay.

00:57:35,630 --> 00:57:39,950 [Speaker 1]

They told us this. They, they thought it's like a warehouse, no machines inside.

00:57:41,370 --> 00:57:41,850 [Speaker 0]

Oh, okay.

00:57:42,950 --> 00:57:49,240 [Speaker 0]

So I, I ask my colleague to give you... We can mark in the map, in the drawing-

00:57:49,240 --> 00:57:49,240 [Speaker 1]

Okay.

00:57:49,240 --> 00:57:51,750 [Speaker 0]

-where the temperature should be. Yeah. Uh-

00:57:51,750 --> 00:57:56,110 [Speaker 1]

Okay. By, by zone, right? For each area.

00:57:56,110 --> 00:57:57,670 [Speaker 0]

Yeah, yeah, by zone.

00:57:57,670 --> 00:57:58,590 [Speaker 1]

Thank you. So-

00:57:58,590 --> 00:58:11,250 [Speaker 0]

[speaking foreign language]

00:58:11,250 --> 00:58:12,970 [Speaker 1]

Okay. So that's one.

00:58:12,970 --> 00:58:13,589 [Speaker 0]

Okay.

00:58:13,590 --> 00:58:21,190 [Speaker 1]

Second item. We, we went to the, uh, to the factory yesterday, myself and Dr. Hadi, and we walked through the whole production machine.

00:58:22,390 --> 00:58:30,149 [Speaker 1]

There is some stainless steel pipes from one, one machine to another, especially to the cooling area and coating.

00:58:31,270 --> 00:58:31,470 [Speaker 0]

Yes.

00:58:31,470 --> 00:58:37,890 [Speaker 1]

Do we need to isolate... Do you need to do some insulation? You, you brought up insulation in, in the previous meeting.

00:58:40,570 --> 00:58:45,130 [Speaker 0]

Insulation, I think for the, for the

00:58:46,290 --> 00:58:49,830 [Speaker 0]

cooler part, we need to do it, I think.

00:58:49,830 --> 00:58:51,530 [Speaker 1]

Okay. All right.

00:58:51,530 --> 00:59:03,950 [Speaker 0]

Maybe also the, the steam, uh, steam piping also better we do because with the, uh, with the insulation, you know, we can, uh, main-maintain, maintain a good quality of the, the steam.

00:59:03,950 --> 00:59:12,070 [Speaker 1]

Exactly. That's what, that's what we want. That was-- That is our concern, quality. We want-- We don't want variations. We don't want...

00:59:13,230 --> 00:59:19,950 [Speaker 1]

We, we want to stay within a certain, uh, percentage range of quality control. You see what I'm saying?

00:59:19,950 --> 00:59:24,670 [Speaker 0]

Yeah. For the insulation also, yeah, I ask my colleague to give you-

00:59:24,670 --> 00:59:24,709 [Speaker 1]

Okay.

00:59:24,710 --> 00:59:26,090 [Speaker 0]

Give you the-

00:59:26,090 --> 00:59:36,910 [Speaker 1]

Exactly. Now, now, now, now we are, we are understanding each other. We want quality. We, we don't want any, uh, surprises in the future. That's what we do. We do preventive risk.

00:59:38,470 --> 00:59:40,170 [Speaker 1]

You understand me?

00:59:40,170 --> 00:59:41,300 [Speaker 0]

Yeah. I got your problem.

00:59:41,300 --> 00:59:48,210 [Speaker 1]

Okay. Now you assure us that there shouldn't be any problem, but we want to ma-- we want an extra security layer on top of that.

00:59:49,250 --> 00:59:50,569 [Speaker 0]

Mm. Okay.

00:59:50,570 --> 00:59:51,240 [Speaker 1]

Okay. Now-

00:59:52,590 --> 01:00:03,470 [Speaker 0]

[speaking foreign language]

01:00:03,470 --> 01:00:06,500 [Speaker 1]

Uh, [speaking foreign language]

01:00:06,500 --> 01:00:06,509 [Speaker 0]

[speaking foreign language]

01:00:06,509 --> 01:00:10,510 [Speaker 1]

[speaking foreign language]

01:00:10,510 --> 01:00:12,250 [Speaker 0]

Okay. We continue.

01:00:13,410 --> 01:00:33,890 [Speaker 1]

Okay. So, uh, third point. Now we're gonna move on to the software. You said we don't need the simulator. That's what I need to understand, why we don't need it. If you want to do optimization efficiency, especially for energy and quality, you know what I'm saying? Uh, you said, uh, can you, can you tell me why we don't need it?

01:00:35,470 --> 01:00:35,900 [Speaker 0]

You know, not we don't need it.

01:00:35,900 --> 01:00:36,910 [Speaker 1]

Forget about the money.

01:00:36,910 --> 01:00:40,210 [Speaker 0]

We, we, we need to do in the beginning, you know, not now.

01:00:40,210 --> 01:00:41,150 [Speaker 1]

Oh.

01:00:41,150 --> 01:00:47,950 [Speaker 0]

Now is late. Yeah, it's late. And also digital twin, we just announced last year. It's not, uh-

01:00:47,950 --> 01:00:48,040 [Speaker 1]

I think it-

01:00:48,040 --> 01:00:49,350 [Speaker 0]

It's not, uh, yeah.

01:00:51,690 --> 01:00:53,610 [Speaker 1]

Ah, it's too late.

01:00:53,610 --> 01:00:59,050 [Speaker 0]

We just announced last year, you know. In the beginning, we don't have this digital twin.

01:00:59,050 --> 01:01:01,220 [Speaker 1]

Oh, it's just launched. Oh.

01:01:01,220 --> 01:01:04,050 [Speaker 0]

Yeah, it's a, it's a new, new thing. Yeah, it's a new, new item.

01:01:04,050 --> 01:01:04,790 [Speaker 1]

Oh, okay.

01:01:05,850 --> 01:01:06,690 [Speaker 0]

And the-

01:01:08,230 --> 01:01:20,220 [Speaker 1]

[speaking foreign language]

01:01:22,030 --> 01:01:29,750 [Speaker 1]

Okay. So what is the solution? Is it too late? We cannot sim-- uh, use your, uh, simulator for, uh, the existing, uh-

01:01:31,526 --> 01:01:36,226 [Speaker 8]

Because this one teach not only the software, also hardware we need to consider.

01:01:37,286 --> 01:01:38,206 [Speaker 1]

Okay.

01:01:38,206 --> 01:01:38,446 [Speaker 8]

So we should-

01:01:38,446 --> 01:01:38,806 [Speaker 1]

Okay.

01:01:38,806 --> 01:01:41,926 [Speaker 8]

We should design this from the beginning.

01:01:41,926 --> 01:01:42,436 [Speaker 1]

I understand.

01:01:42,436 --> 01:01:43,766 [Speaker 8]

Now is, uh... Yeah, it's very-

01:01:43,766 --> 01:01:43,996 [Speaker 1]

Okay.

01:01:43,996 --> 01:01:45,626 [Speaker 8]

-complicated now. Yeah.

01:01:45,626 --> 01:01:47,706 [Speaker 1]

It's, it-- Okay. Is it too late or is it feasible?

01:01:49,366 --> 01:01:50,006 [Speaker 8]

It's too late.

01:01:51,386 --> 01:01:52,626 [Speaker 1]

So there is no-

01:01:52,626 --> 01:01:56,176 [Speaker 8]

It's feasible. We need to, we need to do everything, uh, from beginning, you know.

01:01:57,766 --> 01:02:00,346 [Speaker 8]

So it's not, uh, it's not feasible. It's not economic

01:02:01,366 --> 01:02:02,106 [Speaker 8]

to change everything.

01:02:03,986 --> 01:02:04,866 [Speaker 1]

Say it again. I'm sorry.

01:02:06,506 --> 01:02:20,366 [Speaker 8]

I mean, it's not, uh, it's not economic now to, you know, redesign and make everything from beginning. And I think we are ready also for production. We don't... We cannot, uh, waste too much time on this.

01:02:20,366 --> 01:02:23,766 [Speaker 1]

Does it take a lot of time to, to work, to do that?

01:02:23,766 --> 01:02:27,716 [Speaker 8]

Even for the hardware, we need a lot of things to do for the hardware, not only software.

01:02:27,716 --> 01:02:29,186 [Speaker 1]

Yeah, understand you. Oh, okay.

01:02:29,186 --> 01:02:33,436 [Speaker 8]

Yeah. Yeah, maybe it involve two, three months, the site works.

01:02:33,436 --> 01:02:33,466 [Speaker 1]

Oh, okay.

01:02:33,466 --> 01:02:39,346 [Speaker 8]

To change the tables, install the, you know, uh, different, uh, I don't know, uh, different elements.

01:02:41,346 --> 01:02:41,646 [Speaker 1]

Okay.

01:02:42,726 --> 01:02:42,966 [Speaker 8]

Yeah.

01:02:44,186 --> 01:02:44,506 [Speaker 1]

Continue.

01:02:44,506 --> 01:02:49,986 [Speaker 8]

It's not a simple work, but if we do from beginning, it's quite easier, you know.

01:02:49,986 --> 01:02:54,166 [Speaker 1]

Okay. Let me, let me explain to Dr. Rahali, okay? Give me two minutes.

01:02:54,166 --> 01:02:54,185 [Speaker 8]

Yeah.

01:02:54,186 --> 01:02:54,825 [Speaker 1]

Thank you.

01:02:56,006 --> 01:02:56,766 [Speaker 8]

Okay.

01:02:56,766 --> 01:03:13,826 [Speaker 1]

[background chattering] Uh, Dr. Rahali said, "Do you have an estimate? How much does it cost?"

01:03:15,246 --> 01:03:33,446 [Speaker 8]

Uh, this one I need to check with our electrical engineer because this is another department. I don't have a exact idea. And also this one, I cannot give you, okay, how much cost this system. You know, to discuss which function you want to do. Which function exactly.

01:03:33,446 --> 01:03:33,486 [Speaker 1]

Which function.

01:03:33,486 --> 01:03:34,196 [Speaker 8]

Yeah, because this-

01:03:35,346 --> 01:03:35,486 [Speaker 1]

Okay.

01:03:35,486 --> 01:03:38,546 [Speaker 8]

-involve many, many functions, you know?

01:03:38,546 --> 01:03:38,996 [Speaker 1]

Understand.

01:03:38,996 --> 01:03:41,006 [Speaker 8]

And for sure many function we don't need it, really.

01:03:42,465 --> 01:03:45,286 [Speaker 1]

Okay. We can tell you which functions and, uh,

01:03:46,366 --> 01:03:48,755 [Speaker 1]

and, uh... [background chattering]

01:03:50,946 --> 01:03:55,266 [Speaker 1]

Okay, can you send us something so we pick and choose from it, if you have some...

01:03:56,486 --> 01:03:57,326 [Speaker 8]

Okay. Sure.

01:03:59,266 --> 01:04:03,306 [Speaker 8]

I ask my colleague to, to give you the idea.

01:04:04,666 --> 01:04:04,886 [Speaker 1]

Okay.

01:04:08,446 --> 01:04:19,346 [Speaker 1]

[background chattering]

01:04:19,346 --> 01:04:19,546 [Speaker 8]

So,

01:04:34,346 --> 01:05:08,766 [Speaker 8]

uh, I just... Um, uh, he was away. I'm just, uh, uh, explaining to him what I discussed, uh, with you, uh, uh, uh, around the HVAC system. I told him that you guys are gonna send us some, uh, blueprint to, to, to work with, with the, with the HVAC company. Okay? So that's clear with Mike and, uh, all right? Software, it's clear. They're gonna send us some doc... Uh, some, uh, uh, documentation, and we're gonna see what we can do. Okay?

01:05:09,786 --> 01:05:12,226 [Speaker 8]

Uh, third point. The third point.

01:05:13,306 --> 01:05:34,676 [Speaker 8]

[background chattering] Okay. So Dr. Rahali when he was, when-- Or I was referring to the simulator, he wants to optimize the consumption of energy because the electrical power we have is very powerful. So we, we wanna operate in a efficient way in terms of cost of operations. You see what I'm saying?

01:05:34,676 --> 01:05:34,706 [Speaker 1]

Mm-hmm.

01:05:34,706 --> 01:05:39,266 [Speaker 8]

Especially around energy and which, which you guys know, understand very well, right?

01:05:41,746 --> 01:05:42,946 [Speaker 1]

Yeah.

01:05:42,946 --> 01:05:52,656 [Speaker 8]

Does that make sense? So can we do that to how, how, how to operate at the optimum point with minimum consumption of energy?

01:05:55,146 --> 01:05:55,406 [Speaker 8]

Okay.

01:05:57,906 --> 01:05:59,086 [Speaker 1]

Yeah. Is that doable?

01:06:00,586 --> 01:06:03,486 [Speaker 8]

Yeah, it's doable I think. Maybe, uh-

01:06:03,486 --> 01:06:03,496 [Speaker 1]

Thank you.

01:06:03,496 --> 01:06:07,746 [Speaker 8]

Tomorrow or after tomorrow, we can give you this answer.

01:06:07,746 --> 01:06:09,546 [Speaker 1]

Thank you. Thank you. Thank you.

01:06:09,546 --> 01:06:12,766 [Speaker 8]

Okay. [background chattering]

01:06:14,106 --> 01:06:14,116 [Speaker 1]

Oh,

01:06:17,646 --> 01:06:24,126 [Speaker 1]

okay.

01:06:24,126 --> 01:06:34,766 [Speaker 8]

Okay. So should we continue? Okay. In addition, one last point I just forgot, uh, Dr. Rahali mentioned to me. Uh, he, he wants to simulate different formulas.

01:06:36,846 --> 01:06:42,506 [Speaker 8]

Uh, s- What, what do you mean, you mean... You mean save the different formula, right?

01:06:42,506 --> 01:06:42,826 [Speaker 1]

Yes.

01:06:44,026 --> 01:06:53,076 [Speaker 8]

Yeah, this one you can save in our system and then, uh, you know, when you produce... Okay, formula A. You just choose formula A, automatic, uh, you know, produce.

01:06:53,076 --> 01:06:54,846 [Speaker 1]

No. We, we want to simulate.

01:06:56,466 --> 01:06:57,696 [Speaker 8]

Simulate?

01:06:57,696 --> 01:06:57,786 [Speaker 1]

Simulate.

01:06:57,786 --> 01:06:58,506 [Speaker 8]

Sorry.

01:06:59,906 --> 01:07:01,286 [Speaker 8]

[laughs] What?

01:07:01,286 --> 01:07:17,706 [Speaker 1]

It, it... Okay. He wants to simulate different formulas digitally so he will know exactly how... [background chattering]
Okay. So he want to simulate before to put it into production. Do you think... Is this doable?

01:07:18,986 --> 01:07:20,986 [Speaker 8]

Simulate. You mean the test production or?

01:07:22,146 --> 01:07:24,566 [Speaker 1]

Not testing in, in on site.

01:07:25,626 --> 01:07:29,386 [Speaker 8]

Oh, it's not real. Not real production.

01:07:29,386 --> 01:07:42,830 [Speaker 1]

Not real production. Not real production. Not- [background chattering] Yeah. So we, we don't wanna waste time testing, you know, this formula and stop, shut down, and then, uh, start production. Do you think...?

01:07:45,170 --> 01:07:47,450 [Speaker 0]

This one I don't know we can, we can do it or not.

01:07:47,450 --> 01:07:49,609 [Speaker 1]

We cannot do it, uh, digitally.

01:07:51,330 --> 01:07:53,870 [Speaker 1]

We have to do it a real production, right?

01:07:53,870 --> 01:07:55,010 [Speaker 0]

Yeah. I think you need to do

01:07:56,270 --> 01:07:57,290 [Speaker 0]

with the production.

01:07:59,090 --> 01:08:13,790 [Speaker 1]

[on phone] So did you-- Okay.

01:08:14,990 --> 01:08:39,250 [Speaker 1]

Like, uh, what I just said, he wants to simulate digitally, you know, like in a twin factory, a cert- uh, four or two to three to four, four different formulas where, uh, out, out of which, from the result of the simulator, we go, uh, with certain, with certain, uh, certainty. Okay? We, we can put it into production for testing.

01:08:41,350 --> 01:08:41,510 [Speaker 0]

Mm.

01:08:43,130 --> 01:08:43,610 [Speaker 1]

Yes.

01:08:43,610 --> 01:08:47,970 [Speaker 0]

I, I never hear this before, to be frank. I never hear this before.

01:08:47,970 --> 01:08:48,160 [Speaker 1]

You never hear-

01:08:48,160 --> 01:08:51,220 [Speaker 0]

But let me check with, uh, also this kind of, uh, digital,

01:08:53,490 --> 01:08:55,230 [Speaker 0]

digital system.

01:08:55,230 --> 01:08:55,850 [Speaker 1]

Okay. Just, just-

01:08:55,850 --> 01:08:56,669 [Speaker 0]

Digital system.

01:08:56,670 --> 01:09:03,390 [Speaker 1]

Okay. We're just, we're just exploring, uh, what Dr. Hadi wants to do, you know, efficiently.

01:09:03,390 --> 01:09:03,400 [Speaker 0]

Yeah.

01:09:03,400 --> 01:09:15,210 [Speaker 1]

All right? Again, we're working, uh, we're talking about efficiency here and, uh, and minimizing risk of waste of time and cost and so on. Okay? So if it's doable, since we are partners, you know?

01:09:15,210 --> 01:09:15,330 [Speaker 0]

Yeah.

01:09:15,330 --> 01:09:16,790 [Speaker 1]

If it's doable, I can have a-

01:09:16,790 --> 01:09:20,270 [Speaker 0]

Anything we can do. Yeah, we try to do it. Why not?

01:09:20,270 --> 01:09:35,910 [Speaker 1]

Okay. So, uh, exactly. So if it's doable, check with your team, you know, come back to us, what we can do or how we can do it differently or close to it, at least we'll be, uh, more efficient than doing it, uh, in a real production.

01:09:37,170 --> 01:09:38,810 [Speaker 0]

Mm. Okay.

01:09:38,810 --> 01:09:39,710 [Speaker 1]

Does that make sense?

01:09:41,050 --> 01:09:42,809 [Speaker 0]

Yeah, yeah. It makes sense. Yeah.

01:09:43,860 --> 01:09:43,870 [Speaker 1]

Okay.

01:09:43,870 --> 01:09:46,990 [Speaker 0]

Doctor have a, always have a new idea, really.

01:09:46,990 --> 01:09:52,990 [Speaker 1]

Yeah. He has always... He, he lives, he lives in another dimension. [laughing]

01:09:52,990 --> 01:09:58,910 [Speaker 0]

Yeah, yeah. Doctor, really, doctor, sometimes his idea even more advanced than the manufacturer.

01:09:58,910 --> 01:10:05,430 [Speaker 1]

Yes. Like he wants, he wants a, he wants ma- he wants a, a factory, a smart fa- a smart manufacturer.

01:10:06,670 --> 01:10:07,070 [Speaker 0]

Mm.

01:10:07,070 --> 01:10:07,910 [Speaker 1]

And I'm sure-

01:10:07,910 --> 01:10:08,050 [Speaker 0]

Yeah.

01:10:08,050 --> 01:10:11,110 [Speaker 1]

And, and you... And I'm sure you can do it. I saw it on your website.

01:10:12,170 --> 01:10:18,150 [Speaker 0]

Yeah. Smart manufacturer. I, as I mentioned, you need to design from beginning. You know, add the function-

01:10:18,150 --> 01:10:18,670 [Speaker 1]

Okay.

01:10:18,670 --> 01:10:25,170 [Speaker 0]

It's not easy, really. It's, uh... [laughing] It's because it's not only software. Because it's involved-

01:10:25,170 --> 01:10:25,190 [Speaker 1]

I understand.

01:10:25,190 --> 01:10:27,790 [Speaker 0]

Both software and hardware. Yeah.

01:10:27,790 --> 01:10:30,890 [Speaker 1]

Yeah. It's hardware, you know, sensors and so on.

01:10:30,890 --> 01:10:31,910 [Speaker 0]

Yeah, yeah. Yeah.

01:10:31,910 --> 01:10:35,890 [Speaker 1]

We're just, we're just inquiring. Um, we just, uh, we-

01:10:37,490 --> 01:10:37,770 [Speaker 0]

Right.

01:10:39,610 --> 01:10:47,090 [Speaker 1]

[on phone] Okay.

01:10:48,530 --> 01:11:18,590 [Speaker 1]

Exactly. Uh, four point, four point zero. Okay, so what he say, he's just exploring options with you guys because he, he trusts you and he knows you guys are very smart and, uh, have a good reputation to, uh, especially if it, if, if, if you can get close to it with the existing equipment, that's fine. Even thirty, forty percent to it. But, uh, he's gonna start a, a second line, and he wants to build it, you know, uh-

01:11:18,590 --> 01:11:19,130 [Speaker 0]

Intelligent.

01:11:20,290 --> 01:11:23,190 [Speaker 1]

Exactly. Thank you, man.

01:11:23,190 --> 01:11:24,670 [Speaker 0]

[laughing]

01:11:24,670 --> 01:11:25,130 [Speaker 1]

So...

01:11:26,390 --> 01:11:26,590 [Speaker 0]

Yeah.

01:11:26,590 --> 01:11:29,230 [Speaker 1]

[on phone] Yeah.

01:11:31,230 --> 01:11:43,970 [Speaker 1]

Yeah. So he trust... [on phone] Exactly. So he, he's just trying avoiding any future issues and, uh, have, make it, uh, as much as possible automated. You know what I'm saying?

01:11:43,970 --> 01:11:44,730 [Speaker 0]

Yeah.

01:11:44,730 --> 01:11:48,630 [Speaker 1]

Uh, and, and also for him to, to,

01:11:49,970 --> 01:11:59,930 [Speaker 1]

you know, to succeed together. We are, we are in, we are in this project together, as he mentioned, and, uh, and he knows that, uh, you know-

01:11:59,930 --> 01:12:00,230 [Speaker 0]

Hello?

01:12:00,230 --> 01:12:03,510 [Speaker 1]

You, you, you have solutions, and you can come up with solutions.

01:12:03,510 --> 01:12:04,010 [Speaker 0]

Ah.

01:12:04,010 --> 01:12:04,690 [Speaker 1]

And, uh...

01:12:06,340 --> 01:12:07,170 [Speaker 0]

[on phone]

01:12:07,170 --> 01:12:24,610 [Speaker 1]

Yeah. He said he... [laughing] He said he cannot, uh, supervise, uh, one Meraki with another Meraki on each machine. [laughing] He, he wants, he wants to minimize the human error in another way.

01:12:24,610 --> 01:12:28,150 [Speaker 0]

Yeah. Understand. In Morocco it's difficult.

01:12:28,150 --> 01:12:28,650 [Speaker 1]

Yeah.

01:12:28,650 --> 01:12:37,250 [Speaker 0]

And I, I suggest we need to run the recent factory first to bring profit to PET factory.

01:12:37,250 --> 01:12:37,290 [Speaker 1]

Yeah.

01:12:37,290 --> 01:12:37,909 [Speaker 0]

Then we...

01:12:39,090 --> 01:12:51,590 [Speaker 0]

Yeah, without success in the first one, we cannot plan for. So we must try our best to, to make, uh, first factory a success. Then very fast we can do the second one with the different level.

01:12:53,070 --> 01:12:56,990 [Speaker 1]

[on phone]

01:12:58,290 --> 01:13:20,790 [Speaker 1]

Okay. He, he, he's just, uh, uh, uh, asking if you can, uh, you know, uh, focus on, uh, on the items we discussed in this meeting and, uh, and, uh, so we can move forward to production, as you said.

01:13:20,850 --> 01:13:24,019 [Speaker 0]

Okay.

01:13:24,019 --> 01:13:34,270 [Speaker 1]

[on phone] Yeah. Yeah. Yeah, he's just concerned about the quality of the pro- uh, product and the lifetime, and the shelf lifetime of the bags, you know?

01:13:35,410 --> 01:13:48,251 [Speaker 1]

Uh, so it, it won't, it won't perish, uh, in less than eighteen months. Yeah. Yeah. This, uh, the, uh-- Yeah. So...

01:13:48,251 --> 01:13:50,041 [Speaker 5]

[on the phone]

01:13:50,042 --> 01:13:54,422 [Speaker 1]

So he's just concerned about the quality and the li-- its shelf lifetime of the product.

01:13:54,422 --> 01:13:55,022 [Speaker 5]

Yeah.

01:13:55,022 --> 01:13:57,262 [Speaker 1]

So he want perish like to-

01:13:57,262 --> 01:14:10,162 [Speaker 5]

I'm, I'm thinking because, uh, Cobac now is, uh, producing in, uh, in Agadir, and I think Agadir has a little bit similar like Marrakesh with the humidity, high temperature. No?

01:14:11,402 --> 01:14:12,342 [Speaker 1]

Definitely.

01:14:12,342 --> 01:14:18,542 [Speaker 5]

I studied the weather in Agadir and, uh, Cobac, and me, it's different. Okay.

01:14:18,542 --> 01:14:21,422 [Speaker 1]

Different. Agadir is more... Agadir is humid.

01:14:21,422 --> 01:14:25,062 [Speaker 5]

We don't have, uh, the same temperature. We don't have, uh-

01:14:25,062 --> 01:14:31,202 [Speaker 1]

Yeah, it doesn't go up to fifty degrees, and it, uh, and they have humidity.

01:14:31,202 --> 01:14:32,502 [Speaker 5]

Oh, okay. Different.

01:14:33,762 --> 01:14:34,542 [Speaker 5]

Different. Yes.

01:14:34,542 --> 01:14:35,502 [Speaker 1]

I see. Okay.

01:14:37,722 --> 01:14:38,582 [Speaker 5]

Uh, the display-

01:14:38,582 --> 01:14:39,162 [Speaker 1]

Anyway.

01:14:39,162 --> 01:14:45,082 [Speaker 5]

-is be- is better if you, if you manage the ambiance of the... It's better. Okay.

01:14:45,082 --> 01:14:46,262 [Speaker 1]

Yeah.

01:14:46,262 --> 01:14:46,492 [Speaker 5]

I think, I think, uh-

01:14:46,492 --> 01:14:48,832 [Speaker 1]

I think the Marrakesh is better with, uh-

01:14:48,832 --> 01:14:48,832 [Speaker 5]

Yeah.

01:14:48,832 --> 01:14:51,722 [Speaker 1]

-if you reduce the temperature. It's dry and, uh-

01:14:51,722 --> 01:14:53,932 [Speaker 5]

Exactly. Exactly.

01:14:53,932 --> 01:14:53,982 [Speaker 1]

Yeah.

01:14:53,982 --> 01:15:01,062 [Speaker 5]

And, and we don't trust what- In, in Rabat, in Rabat is, is not good. You have a lot of humidity. Okay.

01:15:01,062 --> 01:15:10,122 [Speaker 1]

Yeah. Yeah. True. Marrakesh is very comfortable. You know, in the, in the summer I was there really very, very comfortable. Very comfortable. I don't feel very hot, really.

01:15:11,782 --> 01:15:43,422 [Speaker 5]

Here now the problem is that you have three months, okay, with the, with the higher temperature. Okay. With hundred. You must, you must to study normally the, the, the minimum control, human control. Okay? And the, and the I, I, I organize, uh, am-ambiance, ambiance temperature. If you want to make something, you to make something this place and for have, uh, uh, uh, [on the phone] production, production correct.

01:15:43,422 --> 01:16:23,222 [Speaker 1]

Yeah. He said he, he, he wants to... A-as I mentioned earlier, he doesn't wanna rely on the human factor, on the technicians on the floor because he forgot to adjust the machine or, or something. So, uh, he wants to, uh, like oil change or, uh, a-any other parameter that the technician, that ne- that technician needs to do manually. So he wants a-as much, uh, uh, uh... He wants assurance that production line, uh, uh, operates in the, in the, uh, in the optimum, uh, uh, area.

01:16:24,282 --> 01:16:24,582 [Speaker 5]

Mm.

01:16:25,782 --> 01:16:28,842 [Speaker 5]

Understand. Humidity, temperature.

01:16:30,982 --> 01:16:34,242 [Speaker 5]

This is the two points is, uh, very important in the-

01:16:34,242 --> 01:16:36,482 [Speaker 1]

Yeah. Yeah. He said those two parameters-

01:16:36,482 --> 01:16:39,722 [Speaker 5]

For this, uh, uh, for this, uh, manufacturer.

01:16:40,822 --> 01:16:41,402 [Speaker 1]

For... Okay.

01:16:41,402 --> 01:16:41,602 [Speaker 5]

Yeah.

01:16:41,602 --> 01:16:46,162 [Speaker 1]

For-- In terms of product quality, he said temperature and the humidity-

01:16:46,162 --> 01:16:46,171 [Speaker 5]

Humidity. Yes.

01:16:46,171 --> 01:16:51,461 [Speaker 1]

-are the main two parameters to monitor and control to have a good, uh, cable.

01:16:51,522 --> 01:16:53,942 [Speaker 5]

Big ships. For export and trusting and such thing.

01:16:53,942 --> 01:16:54,982 [Speaker 1]

Yeah, yeah.

01:16:54,982 --> 01:16:56,152 [Speaker 5]

All, all, all.

01:16:56,152 --> 01:16:56,212 [Speaker 1]

So I-

01:16:56,212 --> 01:17:23,042 [Speaker 5]

I have lot of order. I can make lot of order from Europe, from USA. Okay. I know, uh, what, uh, what, what I talk. Okay. I know me. So maybe you don't know me. [laughs] I know me. Fine. Okay. But I, uh, I receive a lot of, uh, big, uh, big, uh, buyer from, uh, from, uh, from, uh, uh, [on the phone] chain, chain the magasins. Chain.

01:17:23,042 --> 01:17:25,502 [Speaker 1]

Uh, like, uh, uh-

01:17:25,502 --> 01:17:44,072 [Speaker 5]

Carrefour. Carrefour, Carrefour Fresh, lot of shop. And if I have all is tracking, tracking, um, uh, process is okay. You don't have, um, machine learning for automatization or cable. Uh, you can add this complicates for you. I'm,

01:17:45,082 --> 01:17:46,302 [Speaker 5]

uh, [on the phone]

01:17:47,862 --> 01:17:48,882 [Speaker 1]

Uh, sorry.

01:17:48,882 --> 01:17:52,192 [Speaker 5]

I am sorry. I am sorry because normally you can have, uh-

01:17:52,192 --> 01:17:52,562 [Speaker 1]

No, no.

01:17:52,562 --> 01:18:04,682 [Speaker 5]

Uh, you can make, uh, something added just for, uh... If you can quickly... Uh, you have lot of cable. I, I study your cable. Uh, uh, your, your capture, capture your-

01:18:04,682 --> 01:18:05,322 [Speaker 1]

Sensors.

01:18:05,322 --> 01:18:05,902 [Speaker 5]

Yeah.

01:18:05,902 --> 01:18:06,602 [Speaker 1]

Sensors.

01:18:06,602 --> 01:18:07,522 [Speaker 5]

Your sensor. Your-

01:18:07,522 --> 01:18:08,101 [Speaker 1]

Yeah.

01:18:08,102 --> 01:18:15,702 [Speaker 5]

Uh, you receive lots of information about Micos. But if you can add something, the, the, the plus something like, uh, the plus-

01:18:15,702 --> 01:18:18,282 [Speaker 1]

Yeah. If you have another on top of Micos.

01:18:18,282 --> 01:18:19,541 [Speaker 5]

For optimization.

01:18:19,542 --> 01:18:20,622 [Speaker 1]

For optimization.

01:18:20,622 --> 01:18:21,852 [Speaker 5]

Not all. Not all.

01:18:21,852 --> 01:18:23,552 [Speaker 1]

Not all end to end. At least some.

01:18:23,552 --> 01:18:25,232 [Speaker 5]

For one year or for one year.

01:18:25,232 --> 01:18:25,302 [Speaker 1]

Yeah.

01:18:25,302 --> 01:18:30,842 [Speaker 5]

One and a half. Okay. Let's see now is this for the good production.

01:18:30,842 --> 01:18:31,442 [Speaker 1]

Yeah.

01:18:31,442 --> 01:18:39,022 [Speaker 5]

And the second time for optimization and, uh, for economic, uh, you understand me? Uh, if you-

01:18:39,022 --> 01:18:39,292 [Speaker 1]

Yeah.

01:18:39,292 --> 01:18:53,382 [Speaker 5]

-have a program. If I have success, I have money, I can pay you. [laughs] If you have success, I can... You know me, I can sell in Morocco. I have lot of, uh, uh, shop I work with here. Okay?

01:18:53,382 --> 01:18:53,882 [Speaker 1]

Yeah.

01:18:53,882 --> 01:18:54,182 [Speaker 5]

I-

01:18:54,182 --> 01:18:54,781 [Speaker 1]

Yes.

01:18:54,782 --> 01:19:15,072 [Speaker 5]

I, I can have a, I can have a contract with manager for private label with the, uh, all is and, and for export. You must have quality. You don't have problem from the first purchase. The problem, the problem is, problem is not in the, in, in the warehouse. When you sell, when you sell,

01:19:16,382 --> 01:19:22,662 [Speaker 5]

stuff arrive and stay. In, at the first time the, the, the, the cable can, can be-

01:19:22,662 --> 01:19:23,072 [Speaker 1]

Cable. Cable.

01:19:23,072 --> 01:19:44,402 [Speaker 5]

Cable. The cable is good. But if you have maybe see two, three, four months you have some, some, uh, white, white, uh, white part in the cable. Okay? It's not the, the, the first time. Okay. And what, what about after I tell you, "Oh, I don't have a good line. I don't have a... I don't... I have a problem. I cannot sell." Now-

01:19:44,402 --> 01:19:44,842 [Speaker 1]

Mm.

01:19:44,842 --> 01:19:55,482 [Speaker 5]

-my, my analysis, okay, with Mr. Sam is, uhI don't want problem. Uh, uh, problem a bit, bit.

01:19:55,482 --> 01:19:57,201 [Speaker 9]

Uh, like a stupid, uh-

01:19:57,202 --> 01:20:00,642 [Speaker 5]

Stupid problem. I don't want stupid problem. Okay.

01:20:00,702 --> 01:20:02,302 [Speaker 9]

Mm. Yeah.

01:20:02,302 --> 01:20:07,962 [Speaker 5]

I, I, I have... I, I, I ha-- It's sure I have a pro-a problem in my-

01:20:07,962 --> 01:20:07,992 [Speaker 9]

Mm.

01:20:07,992 --> 01:20:12,162 [Speaker 5]

Of my factory. But not stupid problem. You understand?

01:20:12,162 --> 01:20:16,312 [Speaker 9]

Mm. Yeah. Not a, not a simple issue make a problem.

01:20:16,312 --> 01:20:17,502 [Speaker 5]

Exactly.

01:20:17,502 --> 01:20:17,642 [Speaker 9]

Yeah.

01:20:17,642 --> 01:20:33,162 [Speaker 5]

Yeah, and a, and a, it's this big problem for, for, uh, for marketing, for manufacturer, for, uh, for pet factory, for, for pet factory, for, for line, uh, pumps on. Uh, now we are, we are married for this success, you know.

01:20:33,162 --> 01:20:34,522 [Speaker 9]

Mm-hmm. Yes. [chuckles]

01:20:34,522 --> 01:20:43,541 [Speaker 5]

If this stuff I can finance all another company and other manufacturer in, uh, Africa and, uh... You know me, I dream.

01:20:43,542 --> 01:20:43,742 [Speaker 9]

Yes.

01:20:43,742 --> 01:20:44,562 [Speaker 5]

Okay.

01:20:44,562 --> 01:20:46,382 [Speaker 9]

I know you. You can-

01:20:46,382 --> 01:20:46,392 [Speaker 5]

Yeah.

01:20:46,392 --> 01:20:51,042 [Speaker 9]

You can expand very fast. I believe, really. You can expand fast.

01:20:51,102 --> 01:20:56,122 [Speaker 5]

Okay. Now for me, for me, if everything is okay, this line in one years

01:20:57,302 --> 01:21:02,162 [Speaker 5]

is, is finished capacity. You know?

01:21:02,162 --> 01:21:03,862 [Speaker 9]

Yeah. You, you need another one.

01:21:03,862 --> 01:21:21,442 [Speaker 5]

We are now focused on enemy and the situation markets in Morocco, we are, I think, the leader in, in, in the market. And with the right wood, you can, you can, you can have a lot of foreign, okay, if you have a good quality. Okay.

01:21:21,442 --> 01:21:22,082 [Speaker 9]

Mm.

01:21:22,082 --> 01:21:32,442 [Speaker 5]

And if you have something, one, one order is not okay because, uh, temperature, uh, is, is, is, is, is, uh, broken success. Okay.

01:21:32,442 --> 01:21:33,172 [Speaker 9]

Yeah, yeah.

01:21:33,172 --> 01:21:33,222 [Speaker 5]

And-

01:21:33,222 --> 01:21:35,062 [Speaker 9]

Your reputation break.

01:21:35,062 --> 01:21:57,202 [Speaker 5]

Yes. It is critical, uh, period. Uh, I think for sake, uh, I am, uh, very, very stressed. I have a lot of stress because I don't want, uh, something, uh, stupid, something about it. And I talk with you and, uh, with Sam, and nobody know in my, my, my team did this discussion. Okay.

01:21:57,202 --> 01:21:58,502 [Speaker 9]

Oh, okay. Understand.

01:21:58,502 --> 01:21:59,262 [Speaker 5]

Yeah.

01:21:59,262 --> 01:22:01,141 [Speaker 9]

You don't talk to others. Yeah.

01:22:01,142 --> 01:22:05,802 [Speaker 5]

Uh, yes. I told you, uh, this last time is confidential, okay? Because-

01:22:05,802 --> 01:22:06,051 [Speaker 9]

Yeah, yeah.

01:22:06,051 --> 01:22:06,422 [Speaker 5]

I don't want-

01:22:06,422 --> 01:22:06,982 [Speaker 9]

Sure.

01:22:06,982 --> 01:22:16,102 [Speaker 5]

I have a lot of analyses and document about this problem. Now, about this problem that happened. It's a real problem. Okay?

01:22:16,102 --> 01:22:16,962 [Speaker 9]

Mm.

01:22:16,962 --> 01:22:33,422 [Speaker 5]

Real problem. Uh, your... I don't know. Uh, I go with you in Turkish and you have... It's hot and you have a temperature in manufacture. It's okay. It's okay. But you have some segment, some segment, okay, is, uh, you must manage

01:22:34,602 --> 01:22:40,562 [Speaker 5]

for, uh, for know how one country go in Europe and they come back in Morocco. Okay?

01:22:41,762 --> 01:22:41,772 [Speaker 9]

Mm.

01:22:41,772 --> 01:22:53,762 [Speaker 5]

Uh, one, one delivered in Tangier for five hundred dol- five hundred dollar transport, seven hundred dollar one container for one, one, one customer, and you have a problem.

01:22:54,862 --> 01:22:55,002 [Speaker 9]

Mm.

01:22:55,002 --> 01:23:00,262 [Speaker 5]

Because the moisture, the moisture. Moisture?

01:23:00,262 --> 01:23:00,611 [Speaker 9]

Mm. Moisture.

01:23:00,611 --> 01:23:00,611 [Speaker 5]

Moisture.

01:23:00,611 --> 01:23:00,862 [Speaker 9]

Moisture.

01:23:00,862 --> 01:23:08,201 [Speaker 5]

It- it- it look the moisture. You look the moi-- Two, three months after packaging.

01:23:08,202 --> 01:23:09,262 [Speaker 9]

Yes.

01:23:09,262 --> 01:23:12,662 [Speaker 5]

You don't look the moisture in the, uh, when you finish your packaging.

01:23:12,662 --> 01:23:14,611 [Speaker 9]

In the beginning. Yeah. Yeah, yeah.

01:23:14,611 --> 01:23:16,802 [Speaker 5]

Yes. This is the problem.

01:23:16,802 --> 01:23:18,022 [Speaker 9]

Yes, I know. I know, yeah.

01:23:18,022 --> 01:23:21,142 [Speaker 1]

You know, you know the term, you know the term garbage in, garbage out?

01:23:23,522 --> 01:23:24,702 [Speaker 9]

Mm, the which one?

01:23:25,762 --> 01:23:31,142 [Speaker 1]

You know, you know this saying? It's an American saying. Garbage in, garbage out.

01:23:31,142 --> 01:23:33,182 [Speaker 9]

[laughs] Yes.

01:23:33,182 --> 01:23:37,802 [Speaker 1]

We don't know. That's why I try to avoid. [laughs]

01:23:37,802 --> 01:23:55,102 [Speaker 5]

Yeah, yeah. This is the, uh, Mike, good. You must analyze the environment, proposition, automatization, proposition, uh, management, um, um, um, uh, construction, something. Okay. You provide-- could have a line, uh, turnkey-

01:23:55,102 --> 01:23:55,252 [Speaker 1]

Yeah.

01:23:55,252 --> 01:24:01,462 [Speaker 5]

Without stupid work, and you can-- I can sell lot of with good quality.

01:24:01,462 --> 01:24:01,742 [Speaker 9]

Mm.

01:24:02,862 --> 01:24:10,542 [Speaker 5]

This is my... If you have some problem, I cannot sell. In Morocco, it talk a lot of... It talk a lot of here.

01:24:10,542 --> 01:24:10,801 [Speaker 9]

Mm.

01:24:10,801 --> 01:24:12,722 [Speaker 1]

So reputation in another way.

01:24:12,722 --> 01:24:15,192 [Speaker 5]

It talk a lot of... It's a, it's a, it's a-

01:24:15,192 --> 01:24:15,962 [Speaker 9]

Oh, yeah.

01:24:15,962 --> 01:24:16,402 [Speaker 5]

Better than-

01:24:16,402 --> 01:24:17,522 [Speaker 9]

Now in this, uh-

01:24:17,522 --> 01:24:18,662 [Speaker 5]

Better than TikTok.

01:24:18,662 --> 01:24:19,501 [Speaker 9]

More than TikTok.

01:24:19,502 --> 01:24:21,202 [Speaker 5]

More than TikTok. Okay.

01:24:21,202 --> 01:24:22,142 [Speaker 9]

Mm.

01:24:22,142 --> 01:24:28,732 [Speaker 5]

And the, the first problem with the moisture of intoxication, hot dogs, uh,

01:24:29,802 --> 01:24:30,082 [Speaker 5]

uh,

01:24:31,282 --> 01:24:36,622 [Speaker 5]

there is, uh, uh, it's, it's grave. It is, uh, it's a catastrophic.

01:24:36,622 --> 01:24:38,082 [Speaker 1]

Yeah, it's a catastrophic.

01:24:38,082 --> 01:24:39,942 [Speaker 5]

Uh, d'accord.

01:24:39,942 --> 01:24:40,352 [Speaker 1]

Yes.

01:24:40,352 --> 01:24:40,381 [Speaker 5]

But still-

01:24:40,382 --> 01:24:43,222 [Speaker 1]

And now no mistake. No mistake allowed. I know.

01:24:43,222 --> 01:24:44,502 [Speaker 5]

Exactly.

01:24:44,502 --> 01:24:44,902 [Speaker 1]

Mm.

01:24:44,902 --> 01:24:45,422 [Speaker 5]

Exactly.

01:24:45,422 --> 01:24:49,582 [Speaker 9]

Yes. Okay. I like this, but [laughs] uh-

01:24:49,582 --> 01:24:49,702 [Speaker 1]

Yeah.

01:24:49,702 --> 01:24:51,882 [Speaker 9]

Look, I, I want solution. Uh,

01:24:52,942 --> 01:24:52,962 [Speaker 9]

so-

01:24:52,962 --> 01:24:58,402 [Speaker 1]

Yeah, doctor, don't worry. We are with you, okay? Together we improve whatever we can.

01:24:58,402 --> 01:25:02,202 [Speaker 5]

I talk with, uh, Sam. Sam Song and Mike is, uh-

01:25:02,202 --> 01:25:05,702 [Speaker 1]

Oh, he talked so, uh, so much about you guys. He told me, uh-

01:25:05,702 --> 01:25:06,262 [Speaker 9]

[laughs]

01:25:06,262 --> 01:25:13,042 [Speaker 1]

You know, Sam Song, I have the best partners and, uh, I did my research and I told him you have the best equipment. I agree with him.

01:25:13,042 --> 01:25:16,862 [Speaker 9]

[laughs] Thank you, Dr. Leonid. And, uh, I-

01:25:17,902 --> 01:25:18,032 [Speaker 5]

[in French]

01:25:19,142 --> 01:25:39,402 [Speaker 1]

Okay. Yeah, we just, uh, you know, uh, this-- the purpose of this meeting is just to... It's more a risk mitigation. You see what I'm saying? So we're just collaborating with you guys to avoid any unexpected or, uh, or any surprises in the future. That's it.

01:25:39,402 --> 01:25:41,321 [Speaker 9]

Mm-hmm. I, I understand, yeah.

01:25:42,382 --> 01:25:45,441 [Speaker 1]

Yeah. He said that, uh, you know, uh, Smittom?

01:25:45,441 --> 01:25:47,002 [Speaker 5]

[in French]

01:25:47,002 --> 01:25:56,818 [Speaker 1]

Yeah, the consult-- engineer consult-- Moroccan engineer consulting company. I think you, you know about them, right? Uh, no, I-

01:25:59,198 --> 01:26:12,318 [Speaker 9]

No, there is a company in Morocco that did the, the, the, the... What do you call it? The, the project, uh, the project, uh, evaluation for the architecture of the building.

01:26:13,398 --> 01:26:13,998 [Speaker 1]

Ah, okay.

01:26:16,958 --> 01:26:18,178 [Speaker 9]

Eh, eh, excuse me?

01:26:19,418 --> 01:26:21,098 [Speaker 9]

Uh, Mike.

01:26:21,098 --> 01:26:22,218 [Speaker 1]

Yes.

01:26:22,218 --> 01:26:27,758 [Speaker 9]

Uh, you know, someone here, he check your document about authorization in Morocco and, uh, you know.

01:26:27,758 --> 01:26:32,018 [Speaker 1]

That company, right? Oh, yeah, yeah. I, I know. Yes.

01:26:32,018 --> 01:26:34,078 [Speaker 9]

Remember, remember for the metal, you must to add something.

01:26:34,078 --> 01:26:36,578 [Speaker 1]

Oh, for the structure. Yes. Yeah, yeah.

01:26:36,578 --> 01:26:40,658 [Speaker 9]

For all. Structure, for, for climatization.

01:26:40,658 --> 01:26:41,138 [Speaker 1]

Okay.

01:26:41,138 --> 01:26:41,428 [Speaker 9]

For all.

01:26:42,518 --> 01:26:43,898 [Speaker 9]

He sent me the model.

01:26:45,938 --> 01:26:46,818 [Speaker 1]

Yeah, they did the-

01:26:47,998 --> 01:26:50,458 [Speaker 9]

But it's not for pet food.

01:26:50,458 --> 01:26:53,358 [Speaker 1]

Okay. We have, we confirmed with this company,

01:26:54,498 --> 01:26:57,648 [Speaker 1]

all right? With, uh, who did, who did the,

01:26:58,778 --> 01:27:15,138 [Speaker 1]

the, the study of the project, especially when it comes to the HVAC system. And they confirmed they, they did it just, uh, as if, if the building was a warehouse, not a factory.

01:27:15,138 --> 01:27:16,218 [Speaker 9]

Mm-hmm. Okay.

01:27:16,218 --> 01:27:22,378 [Speaker 1]

So the HVAC system they designed is not for a factory, it's for a warehouse.

01:27:22,378 --> 01:27:23,598 [Speaker 9]

Warehouse, okay.

01:27:24,658 --> 01:27:24,958 [Speaker 9]

I see.

01:27:26,138 --> 01:27:34,838 [Speaker 9]

It's not professional. And you know, he put it, uh, something for climatizer. Maybe it's ten thousand dollar every month. [chuckles]

01:27:34,838 --> 01:27:36,558 [Speaker 1]

Of electrical consumption.

01:27:36,558 --> 01:27:46,678 [Speaker 9]

The minimum. Eh, and the ambiance not, not correctly. Yeah. Okay. And I want something also. Also, why in the warehouse you put it, the, the, the, uh, the pot?

01:27:47,798 --> 01:27:53,938 [Speaker 1]

Oh, yeah. He's a-- He has a question. You see how many doors do we have in the warehouse? There are multiple doors.

01:27:55,998 --> 01:27:56,918 [Speaker 1]

The sliding door.

01:27:58,258 --> 01:28:04,798 [Speaker 9]

Yes. We have, uh, many, yes. I think it's two. Two or three, right?

01:28:04,798 --> 01:28:05,118 [Speaker 1]

No,

01:28:06,418 --> 01:28:07,478 [Speaker 1]

it, it is more.

01:28:08,688 --> 01:28:08,908 [Speaker 9]

More?

01:28:10,078 --> 01:28:11,007 [Speaker 9]

The door, not window.

01:28:12,738 --> 01:28:13,878 [Speaker 1]

What?

01:28:13,878 --> 01:28:16,198 [Speaker 9]

Not window. You have, uh, window slide.

01:28:16,198 --> 01:28:20,278 [Speaker 1]

I'm not talking about windows. We're talking about the sliding doors.

01:28:20,278 --> 01:28:22,798 [Speaker 9]

Ah. There are many, many doors.

01:28:22,798 --> 01:28:28,658 [Speaker 1]

Yeah. Why, why did they put the... Why did they put these doors? Is there a reason?

01:28:28,658 --> 01:28:32,058 [Speaker 9]

Yeah, the door, normally for moving material in and out.

01:28:33,198 --> 01:28:41,398 [Speaker 1]

No, there is no door for moving material in and out, but there are doors in the back of the factory. There's like one, two, three, four, five.

01:28:42,778 --> 01:28:44,538 [Speaker 9]

Really? Many doors.

01:28:44,538 --> 01:28:49,218 [Speaker 1]

Many doors. Well, you, you, you built the factory. [laughs] You didn't see them?

01:28:49,218 --> 01:28:53,158 [Speaker 9]

Is it, uh, is it for loading the, the finished product?

01:28:53,158 --> 01:28:54,278 [Speaker 1]

No, no, no, no, no, no.

01:28:54,278 --> 01:29:03,078 [Speaker 9]

You can load the warehouse. It's crazy. You cannot, you cannot manage the, the climatization. So they have lot of this heat.

01:29:03,078 --> 01:29:09,818 [Speaker 1]

Yeah. Uh, there is like... We, we, uh, we, uh, we need to isolate the doors, especially in the area of finished, finished goods.

01:29:10,998 --> 01:29:22,158 [Speaker 1]

In the stocking, the storage area for the, the final products. There are like one, two, three, four, five. Okay, just for the dry area, there's like about four doors.

01:29:23,798 --> 01:29:26,578 [Speaker 9]

So we need to close some door.

01:29:26,638 --> 01:29:29,518 [Speaker 1]

Exactly. Check, check the blueprint and you're gonna understand.

01:29:30,718 --> 01:29:30,998 [Speaker 1]

Okay.

01:29:32,498 --> 01:29:48,678 [Speaker 1]

Yeah. It, it will be, uh, difficult to contain the area, you know, in the ambient, uh, temperature, uh, since we have doors. So there will be like some air coming in. Hot air when it's hot or cool air when it's cool.

01:29:50,278 --> 01:29:51,558 [Speaker 1]

Yeah. And the dust too.

01:29:53,058 --> 01:29:53,278 [Speaker 9]

Yeah.

01:29:54,398 --> 01:29:54,698 [Speaker 9]

True.

01:29:56,198 --> 01:29:58,738 [Speaker 9]

I, I checked the warehouse during.

01:29:58,738 --> 01:30:18,817 [Speaker 1]

Yeah. Check, check, uh, yeah. Check the blueprints of the warehouse and you're gonna see. Uh, he-- We didn't understand why they put so many doors. I think they, they thought it's for, uh, for shipping, for the loading, unloading. Yeah, but the shipping area has already, uh, has already its doors.

01:30:18,818 --> 01:30:20,138 [Speaker 9]

Two key.

01:30:20,138 --> 01:30:23,098 [Speaker 1]

Yeah, two key, uh, main, uh, two-

01:30:23,098 --> 01:30:23,898 [Speaker 9]

For, for, uh-

01:30:23,898 --> 01:30:41,718 [Speaker 1]

Two loading areas and unloading area. Two loading areas. One for dry, one for wet. But then the other side of the warehouse, in the backside, there are like two, two to three doors. But he, he's just, uh, inquiring what was the reason for these doors. Is it for evacuation or what is it?

01:30:41,718 --> 01:30:45,758 [Speaker 9]

Okay, I, I check. I check with, uh, my eng-- our engineer. Yeah.

01:30:46,798 --> 01:30:53,018 [Speaker 1]

Okay. So are we in an agreement now while we are nervous? [laughs]

01:30:53,018 --> 01:30:57,798 [Speaker 9]

Yeah. Already I write down all the points, and, uh, we will reply to you with file. Yeah.

01:30:58,838 --> 01:31:00,678 [Speaker 9]

The official document.

01:31:00,678 --> 01:31:03,458 [Speaker 1]

Yeah. You're gonna send us an email and, uh-

01:31:03,458 --> 01:31:08,518 [Speaker 9]

Yeah. I send you email or by WhatsApp. By email is better, I think.

01:31:08,518 --> 01:31:11,638 [Speaker 1]

Yeah, your email. I'm gonna send you my email too. Can you CC me?

01:31:13,558 --> 01:31:16,438 [Speaker 9]

Yeah. I think you sent me before, right? Or...

01:31:17,758 --> 01:31:20,248 [Speaker 1]

No. I never, uh, sent you an email.

01:31:21,538 --> 01:31:23,798 [Speaker 9]

Okay, you can write to me. M-I-K-E,

01:31:25,198 --> 01:31:25,448 [Speaker 9]

at hotmail.com.

01:31:25,448 --> 01:31:30,238 [Speaker 1]

Okay. I got... I have your email. I'm gonna email you right now. Right after the meeting.

01:31:30,238 --> 01:31:35,658 [Speaker 9]

Oh, okay. Okay. Okay.

01:31:35,658 --> 01:31:43,838 [Speaker 1]

So we, we, we're looking forward for your, uh, responses and, uh, what I say, doctor?

01:31:46,198 --> 01:31:47,298 [Speaker 1]

Yeah. Uh, what we-

01:31:48,818 --> 01:31:48,908 [Speaker 9]

Yeah.

01:31:48,908 --> 01:31:49,018 [Speaker 1]

Yeah.

01:31:53,458 --> 01:32:04,846 [Speaker 1]

So, uh, we're looking forward for your, uh, responses and, uh-Uh, all the points we discussed and also the roadmap, uh, for the what nee-what needs to be done.

01:32:05,986 --> 01:32:08,806 [Speaker 1]

Okay? And, uh-

01:32:08,806 --> 01:32:09,086 [Speaker 0]

Okay.

01:32:10,466 --> 01:32:10,506 [Speaker 1]

Okay?

01:32:10,506 --> 01:32:10,726 [Speaker 0]

Okay.

01:32:11,846 --> 01:32:12,366 [Speaker 0]

Okay, Sam.

01:32:12,366 --> 01:32:12,726 [Speaker 1]

Awesome.

01:32:12,726 --> 01:32:13,985 [Speaker 0]

Okey-doke. Yeah.

01:32:13,986 --> 01:32:19,106 [Speaker 1]

Well, thank you so much, uh, for your time. I really appreciate this meeting. It was very constructive.

01:32:19,106 --> 01:32:19,606 [Speaker 0]

Appreciate it. Yeah, thanks.

01:32:19,606 --> 01:32:22,466 [Speaker 1]

You know, no hard feelings. [laughing]

01:32:22,466 --> 01:32:28,806 [Speaker 0]

[laughing] But, uh, doctor, we need to do faster, really. Start fast. Otherwise, the-

01:32:28,806 --> 01:32:28,836 [Speaker 1]

Okay. Okay, Mike-

01:32:28,836 --> 01:32:31,326 [Speaker 0]

The money is, uh, yeah, is there.

01:32:31,326 --> 01:32:33,226 [Speaker 1]

Okay, Mike, that's why we're trying to do.

01:32:34,266 --> 01:32:34,335 [Speaker 0]

Mm-hmm.

01:32:34,335 --> 01:32:35,866 [Speaker 1]

That's why we're trying to... We're, we're trying to-

01:32:35,866 --> 01:32:46,296 [Speaker 0]

By the way, your, uh, the authorization already approved for everything, right? For the... I mean, we have a sign or not approved before. Now is approved or not yet?

01:32:46,296 --> 01:32:47,886 [Speaker 1]

I think so. Uh, doctor,

01:32:50,186 --> 01:32:56,126 [Speaker 1]

uh, [in foreign language]

01:32:57,166 --> 01:32:58,096 [Speaker 5]

[in foreign language]

01:32:58,096 --> 01:32:58,256 [Speaker 1]

[in foreign language]

01:32:58,256 --> 01:32:58,546 [Speaker 5]

Uh.

01:32:58,546 --> 01:33:02,236 [Speaker 1]

He said that, yeah, he got the authorization. Yeah. It has been approved.

01:33:02,236 --> 01:33:02,706 [Speaker 0]

Oh, okay.

01:33:02,706 --> 01:33:03,666 [Speaker 1]

Approved.

01:33:03,666 --> 01:33:05,446 [Speaker 0]

So it's fine.

01:33:05,446 --> 01:33:07,965 [Speaker 1]

He said he, he's giving you the, the-

01:33:07,965 --> 01:33:08,346 [Speaker 5]

[in foreign language]

01:33:08,346 --> 01:33:11,426 [Speaker 1]

The green light to bring it. [laughing] To install it.

01:33:11,426 --> 01:33:14,026 [Speaker 0]

Oh, okay. [laughing]

01:33:14,026 --> 01:33:14,386 [Speaker 1]

Okay?

01:33:14,386 --> 01:33:15,126 [Speaker 0]

Okay. Yeah, yeah.

01:33:15,126 --> 01:33:16,946 [Speaker 1]

And then one last quick question.

01:33:18,026 --> 01:33:18,266 [Speaker 0]

Yes.

01:33:18,266 --> 01:33:24,526 [Speaker 1]

I know we discussed the, the storage of the oil, and they put it outside. You remember?

01:33:24,526 --> 01:33:24,796 [Speaker 0]

Yeah.

01:33:24,796 --> 01:33:25,346 [Speaker 1]

During the meeting.

01:33:25,346 --> 01:33:26,486 [Speaker 0]

Yes.

01:33:26,486 --> 01:33:31,186 [Speaker 1]

So is it okay even if it's hot, it won't affect the quality of the oil?

01:33:31,186 --> 01:33:44,966 [Speaker 0]

Uh, I think we need... Maximum, we need to do the, you know, like, uh, the insulation to cover the around. So like we storage the grains, you know, in some hot area, they also do the insulation.

01:33:44,966 --> 01:33:45,266 [Speaker 1]

I know.

01:33:45,266 --> 01:33:46,686 [Speaker 0]

They put, uh-

01:33:46,686 --> 01:33:55,706 [Speaker 1]

Well, he, he... That's ig-that's Dr. Rahili, that's, uh, so he said that's exactly what he likes from you. This kind of solution. Uh, because these people have-

01:33:55,706 --> 01:34:05,636 [Speaker 5]

Mike, if you don't, uh, give me permission, the, the man who put it, the oil, uh, in, uh, in, uh, fourteen, uh, temperature or fifteen.

01:34:05,636 --> 01:34:05,686 [Speaker 1]

Yeah.

01:34:05,686 --> 01:34:09,206 [Speaker 5]

Okay. And after they don't have good, uh, good, uh,-

01:34:09,206 --> 01:34:19,026 [Speaker 1]

Good, uh, yeah. So we did, uh... So you said, you said, uh, uh, they did insulation or is there a, uh... Do you have a specific type of, uh, container, you know?

01:34:19,026 --> 01:34:19,926 [Speaker 5]

[in foreign language]

01:34:19,926 --> 01:34:24,126 [Speaker 1]

You know, just give us some, uh, some documentation, what type of container so we-

01:34:24,126 --> 01:34:24,335 [Speaker 0]

It's insulation.

01:34:24,335 --> 01:34:27,786 [Speaker 1]

We validate. We, we validate with them.

01:34:27,786 --> 01:34:28,786 [Speaker 0]

No money.

01:34:28,786 --> 01:34:29,245 [Speaker 1]

What is it?

01:34:30,266 --> 01:34:30,606 [Speaker 0]

No money.

01:34:31,786 --> 01:34:34,596 [Speaker 0]

It's insulation. Insulation.

01:34:34,596 --> 01:34:34,626 [Speaker 1]

Insulation?

01:34:34,626 --> 01:34:35,606 [Speaker 0]

Huh? Yeah, yeah.

01:34:39,046 --> 01:34:42,226 [Speaker 1]

Okay. Uh, just to confirm, did you say insulation?

01:34:42,226 --> 01:34:46,206 [Speaker 0]

Yeah, insulation to cover a surface around. Is, uh-

01:34:46,206 --> 01:34:47,026 [Speaker 1]

Around.

01:34:47,026 --> 01:34:48,446 [Speaker 0]

Yeah.

01:34:48,446 --> 01:34:53,746 [Speaker 1]

Okay, good. Okay. Uh, just add that to the list. Some examples, pictures, you know, so...

01:34:54,886 --> 01:34:55,566 [Speaker 0]

Okay.

01:34:55,566 --> 01:34:58,686 [Speaker 1]

Or some, uh, technical specification of the container.

01:35:00,166 --> 01:35:11,046 [Speaker 1]

So that he will, uh, validate with the, uh, with the, the, the company that will install them. You know, we, we need to double-check what, uh, anything not done by Farmson.

01:35:12,086 --> 01:35:13,486 [Speaker 0]

Yeah, yeah, sure.

01:35:13,546 --> 01:35:14,166 [Speaker 1]

Agree now?

01:35:14,166 --> 01:35:16,486 [Speaker 0]

Okay. Yeah, I agree.

01:35:16,486 --> 01:35:17,166 [Speaker 1]

[laughing]

01:35:17,166 --> 01:35:18,706 [Speaker 0]

I agree.

01:35:18,706 --> 01:35:21,206 [Speaker 1]

Okay. All right.

01:35:21,206 --> 01:35:21,606 [Speaker 0]

Okay.

01:35:21,606 --> 01:35:22,986 [Speaker 1]

Thank you. Thank you.

01:35:22,986 --> 01:35:24,846 [Speaker 0]

Okay. Thank you, doctor. Thank you, Sam.

01:35:24,846 --> 01:35:28,006 [Speaker 1]

Everyone in this meeting, and, uh, we'll follow up in the

01:35:29,066 --> 01:35:29,406 [Speaker 1]

email.

01:35:30,466 --> 01:35:32,706 [Speaker 1]

Yeah. He said he's relying on you.

01:35:34,026 --> 01:35:39,666 [Speaker 0]

Okay, doctor. I do my best. Do more than what I can do, okay? I do my best.

01:35:41,706 --> 01:35:44,366 [Speaker 1]

As always. [laughing]

01:35:44,366 --> 01:35:44,866 [Speaker 0]

[laughing]

01:35:44,866 --> 01:35:46,386 [Speaker 1]

Thank you. Bye-bye.

01:35:46,386 --> 01:35:48,856 [Speaker 0]

Thank you. Thank you, doctor. Thank you, Sam. Bye-bye.

01:35:49,895 --> 01:35:49,906 [Speaker 1]

Bye.

01:35:49,906 --> 01:35:50,246 [Speaker 0]

Bye-bye.
